*(Bengal General Clauses Bill—General Rules of Construction—Sections 6-9)*

Act, unless there is anything repugnant in the subject or context,—

- (1) "land" includes houses and buildings and corporeal hereditaments and tenements of any tenure, unless where there are words to exclude houses and buildings or to restrict the meaning to tenements of some particular tenure, and
- (2) "person" includes any incorporated company or incorporated association of persons

*General Rules of Construction*

Coming into operation of Bengal Act

6 (1) Where any Bengal Act is not expressed to come into operation on a particular day, then it shall come into operation on the day on which it is first published in the Calcutta Gazette after having received the assent of the Governor General

[Ct. Act X 1897, s. 6]

(2) Unless the contrary is expressed, a Bengal Act shall be construed as coming into operation immediately on the expiration of the day preceding its commencement

Printing of date on which Act is published after having received the assent of the Governor General

7 In this Act, and in every Bengal Act made after the commencement of this Act, the date of such publication as is mentioned in section 6, sub-section (1), shall be printed above the title of the Act, and shall form part of the Act

[Ct. Mad. Act I 1891, s. 5  
Bom. Act III 1886, s. 10]

Effect of repeal

8 Where this Act, or any Bengal Act made after the commencement of this Act, repeals any enactment hitherto made or hereafter to be made, then, unless a different intention appears, the repeal shall not—

[Ct. Act X 1897, s. 6]

- (a) revive anything not in force or existing at the time at which the repeal takes effect, or
- (b) affect the previous operation of any enactment so repealed or anything duly done or suffered thereunder, or
- (c) affect any right, privilege, obligation or liability acquired, accrued or incurred under any enactment so repealed, or
- (d) affect any penalty, forfeiture or punishment incurred in respect of any offence committed against any enactment so repealed, or
- (e) affect any investigation, legal proceeding or remedy in respect of any such right, privilege, obligation, liability, penalty, forfeiture or punishment as aforesaid,

and any such investigation, legal proceeding or remedy may be instituted, continued or enforced, and any such penalty, forfeiture or punishment may be imposed, as if the repealing Act had not been passed

Revival of repealed enactments

9 (1) In any Bengal Act made after the commencement of this Act it shall be necessary, for the purpose of reviving, either wholly or partially, any enactment wholly or partially repealed, expressly to state that purpose

[Ct. Act X 1897, s. 7  
Bom. Act V 1897, s. 3]

(2) This section applies also to all Bengal Acts made between the first day of June, 1867, and the commencement of this Act

*(Bengal General Clauses Bill—General Rules of Construction—Powers and Functionaries—Sections 10-17)*

**Construction of references to repealed enactments**      **10** Where this Act, or any Bengal Act made after the commencement of this Act, repeals and re-enacts, with or without modification, any provision of a former enactment, then references in any other enactment or in any instrument to the provision so repealed shall, unless a different intention appears, be construed as references to the provision so re-enacted [Cf. Act 1897 s. 11]

**Commencement and termination of time**      **11** In any Bengal Act made after the commencement of this Act, it shall be sufficient, for the purpose of excluding the first in a series of days or any other period of time, to use the word "from," and, for the purpose of including the last in a series of days or any other period of time, to use the word "to" [Cf. Act 1897 s. 9]

**Computation of time**      **12** Where, by any Bengal Act made after the commencement of this Act, any act or proceeding is directed or allowed to be done or taken in any Court or office on a certain day or within a prescribed period, then, if the Court or office is closed on that day or the last day of the prescribed period, the act or proceeding shall be considered as done or taken in due time if it is done or taken on the next day afterwards on which the Court or office is open [Cf. Act 1897 s. 10]

Provided that nothing in this section shall apply to any act or proceeding to which the Indian Limitation Act, 1877, applies

**Measurement of distances**      **13** In the measurement of any distance for the purposes of any Bengal Act made after the commencement of this Act, that distance shall, unless a different intention appears, be measured in a straight line on a horizontal plane [Cf. Act 1897 s. 11]

**Gender and number.**      **14** In all Bengal Acts, unless there is anything repugnant in the subject or context,— [Cf. Act 1897 s. 14 Ben Act V 1897 s. 1]

(1) words importing the masculine gender shall be taken to include females, and

(2) words in the singular shall include the plural, and *vice versa*

*Powers and Functionaries*

**Powers conferred on the Government to be exercisable from time to time**      **15** Where, by any Bengal Act made after the commencement of this Act, any power is conferred on the Government, then that power may be exercised from time to time as occasion requires [Cf. Act 1897 s. 14]

**Power to appoint to include power to appoint ex-officio**      **16** Where, by any Bengal Act, a power to appoint any person to fill any office or execute any function is conferred, then, unless it is otherwise expressly provided, any such appointment, if it is made after the commencement of this Act, may be made either by name or by virtue of office. [Cf. Act 1897 s. 15]

**Power to appoint to include power to suspend or dismiss**      **17** Where, by any Bengal Act, a power to make any appointment is conferred, then, unless a different intention appears, the authority having power to make the appointment shall also have power to suspend or dismiss any person appointed by it in exercise of that power [Cf. Act 1897 s. 16]

*(Bengal General Clauses Bill — Powers and Functions — Provisions as to Orders, Rules, &c, made under Enactments — Sections 18-24)*

Substitution of functionaries

18 In any Bengal Act made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the application of a law to every person or number of persons for the time being executing the functions of an office, to mention the official title of the officer at present executing the functions, or that of the officer by whom the functions are commonly executed

[Cf. Act X. 1897, s. 17]

Successors

19 In any Bengal Act made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the relation of a law to the successors of any functionaries or of corporations having perpetual succession, to express its relation to the functionaries or corporations

[Cf. Act X. 1897, s. 18]

Official chiefs and subordinates

20 In any Bengal Act made after the commencement of this Act, it shall be sufficient, for the purpose of expressing that a law relative to the chief or superior of an office shall apply to the deputies or subordinates lawfully performing the duties of that office in the place of their superior, to prescribe the duty of the superior

[Cf. Act X. 1897, s. 19]

*Provisions as to Orders, Rules, etc, made under Enactments*

Construction of orders etc issued under Bengal Acts

21 Where, by any Bengal Act, a power to issue any order, scheme, rule, bye-law, notification or form is conferred, then expressions used in the order, scheme, rule, bye-law, notification or form, if it is made after the commencement of this Act, shall, unless there is anything repugnant in the subject or context, have the same respective meanings as in the Act conferring the power.

[Cf. Act X. 1897, s. 20]

Power to make to include power to add to amend vary or rescind orders &c

22 Where, by any Bengal Act, a power to make orders, rules, bye-laws or notifications is conferred, then that power includes a power, exerciseable in the like manner and subject to the like sanction and conditions (if any), to add to, amend, vary or rescind any orders, rules, bye-laws or notifications so made

[Cf. Act X. 1897, s. 21]

Making of rules or bye-laws and is one of orders between publication and commencement of Bengal Act

23 Where, by any Bengal Act which is not to come into operation on the day on which it is first published in the Calcutta Gazette after having received the assent of the Governor General, a power is conferred to make rules or bye-laws, or to issue orders with respect to the application of the Act, or with respect to the establishment of any Court or office, or the appointment of any Judge or officer thereunder, or with respect to the person by whom, or the time when, or the place where, or the manner in which, or the fees for which, anything is to be done under the Act,

[Cf. Act X. 1897, s. 22]

then that power may be exercised at any time after the Act has been published as aforesaid, but rules, bye-laws or orders so made or issued shall not take effect till the commencement of the Act

Provisions applicable to making of rules or bye-laws after previous publication

24 Where, by any Bengal Act, a power to make rules or bye-laws is expressed to be given subject to the condition of the rules or bye-laws being made after previous publication, then the following provisions shall apply, namely —

[Cf. Act X. 1897, s. 23]

(1) the authority having power to make the rules or bye-laws shall, before

*(Bengal General Clauses Bill—Provisions as to  
Orders, Rules, &c, made under Enactments—  
Miscellaneous—Sections 25-28)*

- making them, publish a draft of the proposed rules or bye-laws for the information of persons likely to be affected thereby,
- (2) the publication shall be made in such manner as that authority deems to be sufficient, or, if the condition with respect to previous publication so requires, in such manner as the Local Government prescribes,
- (3) there shall be published with the draft a notice specifying a date on or after which the draft will be taken into consideration,
- (4) the authority having power to make the rules or bye-laws, and, where the rules or bye-laws are to be made with the sanction, approval or concurrence of another authority, that authority also, shall consider any objection or suggestion which may be received by the authority having power to make the rules or bye-laws from any person with respect to the draft before the date so specified;
- (5) the publication in the Calcutta Gazette of a rule or bye-law purporting to have been made in exercise of a power to make rules or bye-laws after previous publication shall be conclusive proof that the rule or bye-law has been duly made

Continuation of orders,  
etc issued under  
enactments repealed  
and re-enacted

25. Where any enactment is, after the commencement of this Act, repealed and re enacted by a Bengal Act with or without modification, then, unless it is otherwise expressly provided, any order, scheme, rule, bye-law, notification or form issued under the repealed enactment shall, so far as it is not inconsistent with the provisions re-enacted, continue in force, and be deemed to have been issued under the provisions so re-enacted, unless and until it is superseded by any order, scheme, rule, bye-law, notification or form issued under the provisions so re enacted

[CY Act X  
1897, s 24]

*Miscellaneous*

Recovery of fines  
XLV of 1892.  
V of 1898

26. Sections 63 to 70 of the Indian Penal Code, and the provisions of the Code of Criminal Procedure for the time being in force in relation to the issue and the execution of warrants for the levy of fines, shall apply to all fines imposed under any Bengal Act or any rule or bye-law made under any Bengal Act, unless the Act, rule or bye-law contains an express provision to the contrary

[CY Act X  
1897 s 25  
Act V 1867  
s 4]

Provision as to offences punishable under two or more enactments

27. Where an act or omission constitutes an offence under two or more enactments, then the offender shall be liable to be prosecuted and punished under either or any of those enactments, but shall not be liable to be punished twice for the same offence.

[CY Act X  
1897 s 26]

Meaning of service by post

28. Where any Bengal Act made after the commencement of this Act authorizes or requires any document to be served by post, whether the expression "serve" or either of the expressions "give" or "send" or any other expression is used, then, unless a different intention appears, the service shall be deemed to be effected by properly addressing, pre-paying and posting by

[CY Act X  
1897 s 27]

*(Bengal General Clauses Bill—Miscellaneous —  
Sections 29, 30)*

registered post, a letter containing the document and, unless the contrary is proved, to have been effected at the time at which the letter would be delivered in the ordinary course of post

*Citation of enactments*

29 (1) In any Bengal Act, and in any rule, by-law, instrument or document made under, or with reference to, any Bengal Act, any enactment may be cited by reference to the title or short title (if any) conferred thereon or by reference to the number and year thereof, and any provision in an enactment may be cited by reference to the section or sub-section of the enactment in which the provision is contained

(2) In this Act, and in any Bengal Act made after the commencement of this Act, a description or citation of a portion of another enactment shall, unless a different intention appears, be construed as including the word, section or other part mentioned or referred to as forming the beginning and as forming the end of the portion comprised in the description or citation

*Saving for previous Acts, rules and bye-laws*

30 Where any Act, rule or bye-law made after the commencement of this Act continues or amends any Acts, rules or bye-laws made before the commencement of this Act, the foregoing sections of this Act shall not by reason merely of such continuance or amendment affect the construction of such Acts, rules or bye-laws

### STATEMENT OF OBJECTS AND REASONS

This Bill does not purpose to effect any change in the law. Its object, like that of the Act it repeals, is to shorten the language of statutory enactments and to provide for uniformity of expression in cases where there is identity of subject-matter.

2 The present Bengal General Clauses Act (Ben Act V of 1867) is very meagre, and experience has shown that it requires to be largely supplemented. Each of the older Legislative Councils in India passed a General Clauses Act between the years 1866 and 1868, and each, with the exception of the Bengal Council, has since passed a new and more comprehensive Act. The North-Western Provinces and Oudh Council passed a comprehensive Act in 1887, a new Act, in great detail, was passed by Parliament in 1889, and the General Clauses Acts of the Governor General in Council were consolidated and greatly extended by Act X of 1897, which follows in many respects the English Act of 1889. The newly constituted Council for Burma has recently passed a General Clauses Act, and the Punjab Council has a similar Act under consideration, both these Acts closely following Act X of 1897. Among the older Legislative Councils in India, the Bengal Council stands alone in having no modern Act of the kind.

3 The Bill closely follows the Act of 1897 passed by the Governor General in Council, and it will have this special advantage that it will tend to secure uniformity of language and construction in Bengal, Indian and English legislation, in so far as they have to deal with the same subject-matter.

4 The references on the margin of the Bill indicate the origin of each provision contained therein, and the annexed Notes on Clauses furnish such further explanatory details as seem to be called for.

### *Notes on Clauses*

*Clause 3*—This clause brings together and defines forty-eight words and phrases of more or less frequent occurrence in the Bengal Statute-book. The arrangement is in alphabetical order, and, in accordance with that order, as also with a view to obviating the risk of oversight, the definitions of the cognate expressions “affidavit,” “oath” and “swear” have been separated and inserted each in its proper place.

*Clause 3 (17)*—This definition is taken *verbatim* from section 3 (20) of the General Clauses Act, X of 1897, passed by the Governor General in Council, and was introduced into that Act for the following reasons—

"It will be observed that this definition differs materially from that contained in the Indian Penal Code, but it is believed that it is a better, being a more equitable and reasonable, definition of the expression 'good faith'. It is now well established in England, for, as Lord Donman, C J, remarked as far back as in 1836 in *Goodman v Harley* (1 A & E, at page 876), 'gross negligence may be evidence of *mala fides*, but is not the same thing. We have shaken off the last remnant of the contrary doctrine' (See also *Jones v Gordon*, L R, 2 App Cas 629, and *Derry v Peek*, L R 14 App Cas 337). Where it is intended to afford protection only in the case of a person who acts in good faith and without negligence, it seems better to say so in terms."

*Clause 3 (19)*—Experience has suggested the desirability of providing a definition of the expression "Government". The present practice is to refer specifically to the "Governor-General in Council" when the Government of India only is meant, and to the "Local Government" when the Government of Bengal alone is in view, but it is frequently useful to refer in general terms to "the Government," as, for example, in legislation affecting public property, and the question has more than once arisen whether such phraseology includes the Local Government concerned as well as the Supreme Government. It is proposed, by introducing here the definition which is already to be found in the Code of Civil Procedure and in the General Clauses Act, 1897, to make it clear for the future that, unless a different intention appear from the context, it does.

*Clause 3 (25)* The words "under the Code of Criminal Procedure for the time being in force" have been added to the definition to be found in section 1 of the present Act (Ben Act V of 1867). They are taken from clause 3 (31) of the General Clauses Act, 1897, and they have always, no doubt, been implied.

*Clause 3 (44)*—The words "with its grammatical variations and cognate expressions" have been interpolated in the definition of the word "swear" to be found in section 1 of the present Act (Ben Act V of 1867), but the law has, no doubt, always been so interpreted.

*Clause 4*—This clause is declaratory of the existing law. It declares that all definitions in the preceding clause which are reproduced from the present Act (Ben Act V of 1867) apply also to all Bengal Acts made after the 1st June, 1867 (the date on which that Act came into force). Any alterations which have been made in the existing definitions have been referred to in the preceding notes, and the fact that the substance is in no case affected has it is believed been satisfactorily explained. Similar declaratory provisions have, where necessary, been added to the other clauses of the Bill.

*Clause 5*—Section 1 of the present Act (Ben Act V of 1867) contains two definitions which it is not proposed to employ for future Acts of the Bengal Council. The first of these defines "land," and it will not be needed, because it is proposed to use the more precise phrase "immoveable property" [see clause 3 (31) of the Bill]. The second defines "person" merely so as to include incorporated companies and associations, but it is proposed [see clause 3 (32) of the Bill] to use this word in future so as to include also unincorporated companies and associations and also other bodies of individuals. In both these cases the changes proposed follow the General Clauses Act, X of 1897. The old definitions must, however, be retained for the purposes of the Acts which they at present govern, and it is more convenient to reproduce them in the Bill (with the necessary limitation) than it would be to leave on the Statute-book so much of the present Act as relates to them.

*Clause 6*—The first sub-clause is declaratory of the practice based upon the provisions of the existing law on the subject, while the origin of sub-clause (2) is to be found in section 36 (2) of the Interpretation Act, 1889 (2 & 53 Vict, c 63).

*Clause 7*—This clause is taken from the Madras and Bombay General Clauses Acts, and will be useful in obviating the necessity of references to the Gazette.

*Clauses 8 and 10*—These are borrowed from the Interpretation Act, 1889, and the General Clauses Act, 1897, and their utility in the direction of abbreviating the phraseology used in enactments scarcely requires demonstration.

*Clause 9*—This clause reproduces section 2 of the present Act (Ben Act V of 1867), but in the language used in section 7 of the General Clauses Act, 1897. The changes in language do not, it is believed, effect any alteration in meaning.

*Clause 11*—The provisions of this clause take the form of "definitions" in the present Act (Ben Act V of 1867), but they would seem to be more appropriately enacted, as in the General Clauses Act, 1897, as rules of construction.

*Clause 16*—The practice hitherto observed in drafting in this country appears to have been to state explicitly in each Act that a person may be appointed "by name or by virtue of his office," if the admissibility of making *ex-officio* appointments is contemplated. This may lead to the inference that no person can be appointed by office unless express authority to that effect is conferred by the law under which the appointment is made. It will, from an administrative point of view, be most convenient to generalize the provision in the manner here indicated.

*Clause 17*—A power to appoint should ordinarily include a power to remove the person appointed. It is, however, not certain that this construction would be adopted universally by the Courts, particularly in view of the fact that it has been usual in Indian Acts expressly to take both powers. The opportunity has, therefore, been sought to establish the rule once for all for the future.

*Clause 21*—It has been held that, even in the absence of any such provision as this, the rule here laid down would hold good. Nevertheless, it seems advisable to follow the lead of the English Statute and to reproduce, with the necessary modifications, section 31 of the Interpretation Act, 1889. This course has already been taken by the Governor General in Council in the General Clauses Act, 1897, section 20.

*Clause 22*—It has been usual in Indian legislation expressly to take power to add to, amend, vary or rescind rules once made in exercise of a statutory power conferred. This has, no doubt, been done *ex abundanti cautela*, inasmuch as it would probably be held that the power exists without any such declaration. But the practice above referred to might give countenance to an argument to the contrary, and the opportunity is now taken to set the matter finally at rest, as has been done for Acts and Regulations of the Governor General in Council by section 21 of the General Clauses Act, 1897.

*Clause 25*—The enactment of this clause will obviate the necessity for including in every repealing and re-enacting Bill a transitory provision to keep any orders, schemes, rules, bye laws or notifications, issued under the law which it is proposed to supersede, in force until replaced by fresh instruments duly promulgated under the new law. It will be observed from the marginal reference that a similar provision has been enacted in section 24 of the General Clauses Act, 1897.

*Clause 26*.—This clause reproduces section 4 of Bengal Act V of 1867, the form of the reference to provisions of the Code of Criminal Procedure being modified, and the section being extended to rules and bye-laws. In strictness the clause should apply only to Acts passed after the 1st June, 1867, and to rules and bye-laws made after the commencement of the new Act, but there seems no danger of recognizing it as of universal application.

*Clause 27*.—This clause, too, should, in strictness, be confined to Acts passed after the commencement of the new law; but its provisions are so obviously proper that there seems no harm in applying them to existing Acts also.

The only substantive provision of the present Act (Ben. Act V of 1867) which is not reproduced in the Bill is section 3, declaring that when new provisions are substituted for old ones the latter shall continue in force until the former take effect. It seems unnecessary to re-enact this section, because the time at which substituted provisions are to take effect usually is, and certainly always ought to be, stated in the amending Act itself. There is no similar section in the General Clauses Act, 1897.

BAY OF BENGAL AND ARABIAN SEA

*Alterations in storm signals at ports of India*

WITH reference to Notice to Mariners No 108, dated the 30th April last, issued by this office, the British Admiralty has given further notice (No. 351 of 1898) that information has been received from the Government of India that, on 1st April 1898, the undermentioned system of storm signals was adopted at all the ports of India, with the exception of those in the river Hugh, and with that exception the previous systems have been discontinued —

#### *Day signals*

1. CAUTIONARY.—BAY OF BENGAL.—The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed squally weather in the Bay of Bengal, which may be the first stage of the formation of a cyclonic storm, and which, if it develops, is likely to affect that part of the coast on which the port, where the signal is shown, is situated

**ARABIAN SEA** — The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed weather off the west coast of India near the port or ports where the signal is shown, or the advance of a cyclonic storm across Hindustan from the Bay of Bengal, which may shortly give squally or stormy weather in the Arabian sea

In either of the above cases if the disturbed conditions pass away without producing stormy weather, the cautionary signal is hauled down, but if the disturbed weather will probably develop into a cyclone, signals indicating the probable position, character, and track of the approaching storm, are shown as follows

- 2 **WARNING SIGNAL** — A *ball* indicates that a cyclonic storm has formed, which will probably reach the port where the signal is shown, but is still at a considerable distance from it

The same signal will also be shown at more important ports on the west coast of India to indicate that a storm has formed in the Arabian sea at some distance from the coast and will shortly cross one or other of the tracks of vessels leaving those ports, but will not reach such ports. The Port Officer will receive details to communicate to vessels leaving the port

- 3 **ANGER SIGNALS** — (a) A *cone*, apex downwards, indicates that a cyclonic storm, probably slight to moderate, is affecting the port, and that its centre will probably cross the coast considerably to the southward  
(b) A *cone*, apex upwards, indicates that the centre of such a storm as above (3 a) will probably cross the coast considerably to the northward  
(c) A *drum* indicates that the centre of such a storm as above (3 a) will probably cross the coast over or near the port
- 4 **GREAT DANGER SIGNALS**. — (a) A *cone*, apex downwards, over a *ball*, indicates that a cyclonic storm of great intensity is affecting the port and that its centre will probably cross the coast considerably to the southward  
(b) A *cone*, apex upwards over a *ball*, indicates that the centre of such a storm as above (1 a) will probably cross the coast considerably to the northward  
(c) A *drum*, over a *ball*, indicates that the centre of such a storm as above (4 a) will probably cross the coast over or near the port.

#### *Night signals*

- 1 No cautionary signals are shown at night
- 2 A *red* light indicates similarly to warning signal (2) above
- 3 (a) A *red* light, placed vertically over a *white* light, indicates similarly to danger signal 3 a, above  
(b) A *white* light, placed vertically over a *red* light, indicates similarly to danger signal 3 b, above  
(c) Two *red* lights, placed vertically, indicate similarly to danger signal 3 c, above
- 4 (a) Two *red* lights, placed vertically over a *white* light, indicate similarly to great danger signal 4 a, above  
(b) A *white* light over two *red* lights, placed vertically, indicates similarly to great danger signal 4 b, above  
(c) Three *red* lights, placed vertically, indicate similarly to great danger signal 4 c, above

AUSTRALIA, EAST COAST—BRISBANE RIVER

*Alterations in lights and beacons*

THE British Admiralty has given notice (No 359 of 1898) that the undermentioned information dated 2nd May 1898, relating to lights and beacons in Brisbane river, has been received from Lieutenant and Commander C. W. S. Leggatt, R. M. S. *Goldfinch* —

- 1 A *fixed white* light is shown from West beacon, on the detached, dry bank at the western side of the entrance to the river

Approximate position, lat 27° 21' 55" S, long. 153° 10' 20" E

- 2 A *fixed white* light is shown from the white beacon situated S. by W  $\frac{1}{2}$  W, distant  $\frac{3}{4}$  cables, from the south-west angle of the Boatman's house enclosure, Lytton, and a *fixed red* light from the white beacon which in line with the first leads through Lytton reach in direction marked G. on Chart

These beacons and lights would shortly be moved southward of their previous positions, and then in line would lead in the channel northward of Gibson island

- 3 Two beacons, the north-eastern (front) to show a *red* light and the south-western (rear) a *white* light, which in line would lead up Lytton reach, were in course of erection at the north-east end of Gibson island
- 4 The lights (*red*, front, *white*, rear) previously shown from the beacons on the northern side of Lytton reach, opposite Gibson island, have been discontinued, and in lieu thereof two white beacons the front one showing a *fixed red* light and the rear a *fixed white* light, have been erected on the south side of the river eastward of Queensport
- These last beacons in line lead in the channel through Eagle farm flats
- 5 Also, that the western sides of Bulmba and Humbug reaches have recently shoaled considerably, for a distance of about 4 cables on each side from Humbug point, and a note to that effect has been placed on the Chart

*Reported rock above water*

THE British Admiralty has given notice (No 360 of 1898) that information has been received that the Master of the American Missionary steam vessel *Morning Star* reports having passed, in lat 7° 32' N, long 173° 13' W, a ragged coral rock, about a quarter of a cable in extent, and 6 to 10 feet high

A rock, with the words "Bray rock, 6 to 10 feet high," written against it, has been placed on the Admiralty Chart in the above position

As islands had formerly been reported in this locality by whalers, viz, one in lat 7° 48' N, long 173° 12' W, and "Four rocks" in lat 7° 51' N, long 176° 6' W, it is probable that a reef exists in the vicinity, of which the rock reported is a head above water

## BACTERIOLOGICAL EXAMINATION OF SUSPECTED PLAGUE CASES

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to state whether, with the exception of the Kapalitola case, any other case of plague has been subjected to the bacteriological test? If so, will the Government lay on the table the results of such examination? If not, having regard to the strong differences of opinion as to the existence of the plague in Calcutta, and the fact that the bacteriological test is the only true test in these cases, and that in its absence mistakes have been committed—eleven cases having been officially eliminated from the returns after being inserted therein—will the Government be pleased to make arrangements for the regular bacteriological examination of at least a few cases every week by an experienced and competent bacteriologist?

The Hon'ble MR RISLEY replied—

“In addition to the Kapalitola case, eight cases of plague have been subjected to the bacteriological test by the Health Officer of Calcutta. In five of these the plague bacillus was found. The record of the experiments is technical, and no useful purpose would be served by publishing it. Thirty other cases were examined after death by the Professor of Pathology, Medical College, and the plague bacillus was traced in most of the important organs. These enquiries will be continued. In the case of living persons bacteriological examination is inadmissible, because of the danger of converting a simple bubonic attack into a septicemic one by pricking or incising the buboes.”

## HOME SEGREGATION OF PLAGUE CASES.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to state whether, out of the 176 cases of plague (*vide* Plague Returns, 13th July) which have occurred in Calcutta, there has been any case which has been traced to *contact* and whether there has been any instance in which a case of plague having occurred, it has been followed by similar cases in the same house, within the admitted incubation period? If there have been no such cases and if the plague so far during the past three months has not been found to be infectious, will the Government be pleased to direct that home segregation be allowed in accordance with indigenous customs, such as are observed in cases of small-pox, the patient being confined to a room in the house to which all access on the part of the other members is forbidden and the house itself to all intents and purposes is segregated?

The Hon'ble MR RISLEY replied—

“In ten instances a case of plague has been followed by similar cases in the same house. The Government is not prepared to modify the existing practice in respect of segregation.”

## HOME TREATMENT OF PLAGUE CASES.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether, having regard to the non-infectious character of the disease

as it prevails in Calcutta, to the necessity of absolute rest in plague cases as emphasized in General Gatacre's report quoted in the margin and the danger of removing patients to a hospital, will the Government be pleased to permit patients being treated in their own houses which may not have been previously licensed on the recommendation of competent authorities or under such safeguards as it may prescribe?

“No fact in the clinical phenomena of plague remains more indelibly impressed on the mind than the extremely frequent and alarmingly sudden and unexpected death of patients who are apparently well on the road to recovery. The pulse may be normal in frequency and force, the temperature normal for some days, and yet some slight exertion, such as sitting up prematurely in bed, may lead to fatal syncope, and nothing was found in two such cases in the heart itself to account for the result.” (Page 59)

“The success of any treatment depends on early and good nursing and keeping the patient lying down until the temperature has been normal for at least four days. The injudicious breach of this rule, namely, that the patient should not even sit up for any purpose, led to the death of twenty convalescents by syncope in spite of urgent and repeated warnings.” (Page 59)

The Hon'ble MR. RISLEY replied —

"Under Plague Regulation No. 9 the Health Officer has discretion to deal with such cases and to grant a license at once. But if the premises require structural alterations in order to render it possible to isolate the patient in the upper storey or on the roof, it will not be possible for him to license them. People will therefore do well to apply for licenses beforehand. The instances given in my reply to Question No. 11 show that it is not correct to describe plague as non-infectious."

#### FISH AND MEAT DIET IN THE ALIPORE JAIL

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(a) Will the Government be pleased to state whether it is the case that the dietary allowance of fish or meat allowed to prisoners twice a week in the Alipore Jail has been discontinued since the 15th March last? If so, will the Government be pleased to state the reasons for discontinuing this concession?

(b) Having regard to the outbreak of the plague and the necessity of keeping the prisoners in a suitable condition of bodily health and strength, will the Government be pleased to direct that the dietary allowance of meat and fish twice a week should again be continued to the prisoners in the Alipore Jail?

The Hon'ble MR. BOLTON replied —

"Meat or fish is not included in the ordinary diet sanctioned for prisoners in this Province. It may, however, be issued in place of part of the ration of dāl under certain circumstances, viz., (a) when the fortnightly weighments show that an unusual proportion of the prisoners are losing weight, (b) when there are symptoms of scurvy among the prisoners, or (c) when the number of cases of dysentery is unusually large and is increasing.

"Last year on account of the prevailing scarcity a large proportion of the newly-admitted prisoners were in poor health, and it was then considered advisable in the Alipore as well as in the other Jails of the Province to issue meat or fish twice a week. In March last, Dr. Comins issued a Circular, directing the discontinuance of fish or meat in the ordinary ration, having previously satisfied himself that the general health of the prisoners was so satisfactory that any addition to the ordinary diet was no longer necessary.

"That the discontinuance of the meat or fish ration has not been followed by any bad effects is shown by the facts that the sickness and mortality in the Alipore Jail have been lower during the last six months than during the corresponding period for many years, and that the great majority of the prisoners are steadily gaining weight.

"All the prisoners in the Jail are inspected every week by the Medical Officer, and it is open to him to order an extra diet of meat, fish, milk, or other articles if he considers them necessary. This discretionary power is largely used, there are at present 67 prisoners in the Alipore Jail getting an extra allowance of fish, meat, or milk, exclusive of those in hospital.

"As the general health of the prisoners in the Alipore Jail is at present exceptionally good, there is no reason for incurring the very considerable additional expense which would be caused by the addition of meat or fish to the ordinary ration.

"It is hoped that the precautions which have been taken will guard against an outbreak of plague in the Alipore Jail."

#### ALLEGED DEATHS FROM STARVATION IN THE CHITTAGONG DISTRICT.

The Hon'ble BABU JATRA MOHAN SEN asked—

(a) Has the attention of the Government been drawn to the reports which have appeared in the *Jyoti* newspaper, published in Chittagong, regarding the prevalence of acute distress in the Chittagong district, caused by the failure of crops, the survey operations, and the recent cyclone? Is it the case, as

reported in the *Jyoti* of the 14th July, that two persons, Meher Ali's daughter, living at Baratali, and the daughter of Anwar Ali of Jaldi, have actually died of starvation, and that, as also reported in the *Jyoti* of the 16th and the 23rd June, 4 cases of death by starvation have occurred at Kotpara, Bagmara, and Katharia, that further owing to the severity of the distress, one Budhni sold her child, 4 years old, for five rupees, as reported in the *Jyoti* of the 16th June, and that a man named Pitambar Dhupe of Padua (*vide* the *Jyoti* of the 9th June), no longer able to obtain food for his family, in sheer desperation murdered his wife, mother, and daughter and then attempted to commit suicide, which case is now under trial?

(b) Will the Government be pleased to lay on the table any report which it may have received from the Chittagong authorities in connection with the prevailing distress?

(c) Having regard to the severity of the crisis, will the Government be pleased to state what relief has been afforded by the local officers, and whether it is in contemplation to afford any further relief?

The Hon'ble MR FINUCANE replied —

“(a) The attention of Government was drawn to certain allegations as to the prevalence of distress in Chittagong, contained in the issue of the newspaper *Jyoti* for the 2nd June, and a report was called for from the local officers, funds being at the same time placed at their disposal for the relief of distress if necessary. The Collector reports that some of the villages in which distress is alleged to prevail lie far outside the area affected by the recent storm-wave. Enquiry was made in June, and it was found that the allegations as to the occurrence of deaths from starvation were incorrect, and in one instance were believed to have been based on the statements of a school-boy, made without any knowledge or enquiry. The village panchayets and the chaukidars denied that any deaths from starvation had occurred.

“In villages lying within the Satkania thana, in which severe distress was alleged to exist, the distribution of relief was stopped in the end of May under the Commissioner's orders, on the ground that it was no longer required, while it is reported by the Assistant Engineer in charge of the repairs of the Kutubdia Embankments that he can employ many more labourers on that work than the number who now seek employment on it. The Collector of Chittagong has recently been on tour in the areas alleged to be distressed.

“(b) The reports received from the Commissioner and Collector are laid on the table.

“(c) The measures of relief taken were described in a Resolution, dated 28th March, 1898, which was published in the Gazette of 30th idem. It is reported that of the allotment of Rs. 1,25,000 made for Land Improvement Loans during the financial year 1897-98, the sum of Rs. 9,369 remained unexpended on the 1st April, 1898. An allotment of Rs. 11,750 was at the disposal of the Commissioner of Chittagong for distribution in the shape of Land Improvement and Agricultural Loans during the present financial year. Government has no information which would lead it to suppose that that sum will be insufficient, and no applications have been received for further allotments.”

No 974C, dated Chittagong, the 2nd July, 1898

From—G. E. MANISTY, Esq., Offg. Commissioner of the Chittagong Division,  
To—The Secretary to the Government of Bengal, Revenue Department

WITH reference to your letter No 373T.—R. of 23rd June 1898, forwarding copies of the *Jyoti* of 2nd June 1898, and the *Bengalee* of 11th instant, and calling for a report as to the cases of starvation and distress mentioned in them, I have the honour to report as follows.

2 The article in the *Bengalee* is practically a translation of the *Jyoti* article, and gives no other names of villages or persons. On receipt of your letter (on 25th June) I suggested to the Collector that local enquiry might be made by the Assistant Superintendent of Police, and also by

Mr Ward, Assistant Collector Mr. Anderson had, however, previously ordered enquiry into the *Jyoti's* statement by the Police Inspector

3 I beg to enclose copies of the Inspector's diaries of 24th and 25th June and of extracts relating to the said article from the Collector's No 826G of 28th June It appears from these that there have been no deaths from starvation The Collector does not consider the villages named as newly so badly affected by the cyclone and storm-wave as other parts more to the south (outpost Jaldi and thana Chakania) Indeed he says of the four villages mentioned in the *Satkana* thana that they were "far outside the track of the storm-wave" and "are not suffering from the consequences of the cyclone" This is somewhat significant, as I had, towards the end of May, induced the Collector to put a stop to what seemed to me waste of Famine Fund money in the *Satkana* thana Apparently there was some connection between this and the publication of the article in the local *Jyoti* The Assistant Engineer, Mr J B Ralph, who acquired great experience in the Bombay Famine and has personally visited and critically noticed the storm-wave area when supervising embankment repairs in Kutubdia island since December last, has informed me that from the time of his very first visit he has never come across a single child showing the unmistakable signs of starvation I attach great weight to his opinion, because it is absolutely independent and based on actual experience of what starvation is, besides which he has been and still is employing labour all round Kutubdia island So early as December last he tells me he could not get enough labour locally and had to use imported labour to some extent, owing to the fact, generally told him in the locality, that the men by going elsewhere to work could get their wives and children fed gratuitously (from the Famine Fund) on the adjoining mainland in *Satkana* thana I fear the prolonged distribution of gratuitous relief by the *Satkana* Tahsildar and his subordinates, long after the Subdivisional Officer of Cox's Bazar had said no further relief was wanted in his part of the submerged area, has induced people now to still try and get assistance, though not warranted by their condition

4. The Collector is about to start on tour in the parts which he considers worse than those named in the *Jyoti*, and, if he finds any distress such as private local charity is not likely to relieve, I will report to you on the subject. I may mention that the Assistant Engineer says he can give work to many more men if they want it on the Kutubdia embankment

5. The newspapers are returned as requested

### BENGAL POLICE

*Extract from the Diary of Inspector Protap Chandra Sen of the Chittagong B Division, dated 24th June 1898*

Diary	District Superintendent's remarks
<p>Reached Bagmara Ghat at 7 A M, with Head-Constable Jagan Chandra De and Constable Shuk Raj From 7½ A M up to 1 P M visited Bagmara, Badkhola, and Palgram, and held conversations with the people of the locality, but no evidence was found to show that any man died by starvation The people complained that they are now in great difficulty and want aid from Government Among the crowds I found several men who recently returned from Arracan after earning money and wanted relief from Government The panchayet of Bagmara stated that the people of his village and other neighbouring villages lying on the sea-shore suffered a great deal from cyclone, still they did not get any assistance from Government The relief work was not done by the Police, and so I cannot say anything about the complaints The panchayet has submitted a written petition, which I shall submit with my report, for information. I do not understand why the people did not complain before the Magistrate just after the cyclone, if they did not get any Government aid.</p> <p style="text-align: center;">* * * *</p>	

## BENGAL POLICE

*Diary of Inspector Protap Chandra Sen of the Chittagong Is Division, dated the 25th June 1898*

Diary	District Superintendent's remarks
<p>In the morning visited Kalipore and other neighbouring villages. No man died by starvation in the locality, as I was informed by the villagers, but the people told me that they want aid from Government. I saw the Sub-Registrar of Kalipore. He was a relief officer for sometime after the cyclone, and has also much local experience. He said that he has received no information about the death of any man by starvation and no aid will be required for the labouring classes. He is also of opinion that the people of the middle and begging classes are in little difficulty now. As they do not get any assistance from their neighbours, and especially the begging class, people do not get sufficient rice now by begging.</p> <p>Returned to Palagram at 12 A.M., and met with one Bhairab Chandra Sikdar of Boilsori. He is a man of low birth (Malakar by caste). He is known to be a petty talukdar and money-lender. His son, Sashi Kumar Malakar, is now a student of third class Chittagong Government School. This boy gave information to the editor of <i>Jyoti</i> (Chittagong local paper) that the people are now dying by starvation, and the editor published the same in his paper of the 2nd and 16th June 1898. The boy has gone to Chittagong, and so I could not see him. I asked the boy's father, Bhairab Shikdar, if he can prove the above allegations. He said in presence of several respectable gentlemen that he has no evidence to support the above statement, and he also gave a written petition to me stating that he cannot say if the deaths were due to any disease or to any other causes. The rumours were spread out that some men died by starvation, and so his son gave information to the editor without making any enquiry how the people met their deaths. His son believed what he heard from the people. Neither he nor his son saw them before or at the time of their deaths. I am now enquiring about all recent deaths in the locality. I have come to know from the village panchayets, chankidars, and other people of the locality that no deaths were due to starvation. I give below the names of persons who recently died in the locality —</p> <p>Ramgati of Bagmara died of chronic pain  Majheenessa, daughter of Anwarali, Kutpara, died of fever  Fakir Chand Dhupae of Kathoria died of dropsy  Almajan, daughter of Barkat Ali, Kathuria, died of fever  Tanda Mia, son of Amanali, Kathoria, died of fever</p> <p>The relations of the deceased stated before the Head-Constable of Banskhali that the deaths were due to starvation, but the Head-Constable did not believe their statements. It has been proved by the village panchayats and other people that Barkat Ali has lately purchased 14 kanis of paddy lands, and Amanali is plying boat at Ariacan and is selling rice and <i>dhán</i>. The conditions of the other men are not so bad.</p> <p>Bhairab Shikdar's son, Sashi Kumar, induced the people of the locality to report to the Police that the people were dying by starvation. The people did so with the hope of getting Government aid, and the object of Sashi in inducing the people was simply to take credit among the uneducated mass of people and specially among his tenants.</p>	

*Extract from the Chittagong Collector's No. 826 G, dated 28th June, 1898, to the Commissioner of the Chittagong Division.*

3 Distress is said to prevail in four villages in thana Satkania, namely Sukchari, Kalanjan, Amirabad, and Padua. These villages lie far inland in a sheltered valley, were far outside the track of the storm-wave, and, if owing to the high price of rice, any of the poorer people are finding it hard to make ends meet, it is the duty of their richer neighbours to help them. At all events, I do not think that money collected for the relief of famine in foreign countries should be applied to supplement or supplant private charity in such villages. Doubtless there is hardly a village in the district where widows and orphans are not feeling

the pinch of two bad seasons and consequent high prices I would not on that account advise the spending of public money upon them. These villages are not suffering from the consequences of the cyclone.

4. Distress is also said to exist in six villages in thana Bauskhali, namely Banchari, Kathoria, Bagmara, Kotpara, Manikpathan, and Chochuria. No 18 In only two of these villages suspension and remission of revenue has been recommended. These villages were affected by the storm-wave, though by no means to so deplorable an extent as villages further south. When the statement appeared in the *Jyoti* I directed the police to enquire and report. Unfortunately, in my absence in camp, a head-constable was told off to report—an obviously injudicious proceeding where it is to the interest of the people to have relief operations started. An Inspector is now enquiring into the alleged cases of starvation, and I am expecting his report daily.

## ALLEGED REDUCTION OF EDUCATIONAL GRANTS IN CHITTAGONG

The Hon'ble BABU JATRA MOHAN SEN asked—

(a) Is the Government aware that the Commissioner of the Chittagong Division has directed a considerable reduction of educational grants made by the District Board of Chittagong in respect of the middle class English and vernacular education on the ground that such reduction is necessary to meet the charges incurred to repair the damages caused by the late cyclone? As the effect of this order, which has been or is proposed to be adopted by the District Board, will be to deal a heavy blow at the interests of education in the district, will the Government be pleased to direct a reconsideration of this order?

(b) Will the Government be pleased to advance money from the Provincial funds or recommend the District Board the raising of a loan to repair the damages caused by the cyclone?

The Hon'ble MR. RISLEY replied —

“The Government has no information on the subject of the alleged reduction of educational grants in Chittagong. The powers of the Commissioner in respect of the estimates of the District Board are defined in sections 48 and 49 of the Bengal Local Self-Government Act of 1885. Under section 50 of the same Act, the District Board has power to borrow from Government or from the public subject to the provisions of the law relating to the raising of loans by local authorities.”

## RELAXATION OF PLAGUE REGULATIONS.

The Hon'ble BABU NORENDRA NATH SEN said—

Government is, no doubt, aware that the conservancy of Calcutta is seriously suffering from the flight of dhangars, mehters, carters, &c. In view of the danger threatened by this state of things to the health of the Town, and also in view of the suspected cases of plague being, even at the end of over three months, still of a sporadic character, and showing not the least sign of infectiousness, should not Government be pleased to further relax the plague regulations, at least in favour of these men, who are so indispensable to sanitation, in order to induce them to return to their work?

The Hon'ble MR. RISLEY replied —

“The conservancy employes have been informed that if they are attacked by plague they will be removed to special isolation sheds. No further relaxation of the rules is necessary.”

## CONNECTION BETWEEN DRAINAGE AND FEVERS

The Hon'ble BABU NORENDRA NATH SEN said—

Government is, no doubt, aware that the underground drainage system was strongly condemned as positively calculated to give rise to fevers of the most pernicious type by some of the highest medical authorities of the time (such as Dr Mouat, Chevers, &c), when the scheme was under consideration, and that the late Health Officer of Calcutta, Dr Simpson, in all his reports, used to draw serious attention to the most unsatisfactory condition into which the sewers of Calcutta had already fallen, and to the still more alarming state into which they were drifting, causing both increased humidity and contamination (with poisonous gases and liquids) of the subsoil of the Town, to which he attributed the increased prevalence of fevers of all kinds. Would it not be worth investigating how far the measures that are at present being taken by the Municipality are calculated to remove the evils complained of by Dr Simpson, and also inquiring if the fevers now occurring in Calcutta, having some of the symptoms of plague, are not in reality malarious fever of a malignant type (such as devastated Ula, Santipore, Kalna, Burdwan, &c, more than thirty-five years ago), the sewer gases, according to medical authorities, aggravating the typhous condition, and causing enlargement of glands?

The Hon'ble MR RISLEY replied —

“The new drainage scheme is calculated to remove the evils complained of by Dr Simpson. The results quoted in my reply to the Hon'ble Babu Surendranath Banerjee's first question prove that the disease referred to is true plague and not merely malarial fever of a malignant type.”

## CLINICAL REPORTS AND BACTERIOLOGICAL EXAMINATION IN PLAGUE CASES.

The Hon'ble BABU NORENDEA NATH SEN asked—

Will the Government be pleased to state if detailed clinical reports have been kept of the cases that have been pronounced and suspected as plague, and has any bacteriological examination been made and recorded of any other than the first case at Kapaltola, and have the microscopical specimens been preserved, so that they might at any time be seen by any expert bacteriologist?

The Hon'ble MR RISLEY replied —

“Detailed clinical reports have been kept of all plague cases, and microscopic specimens have been preserved in most of the cases referred to in my answer to the Hon'ble Babu Surendranath Banerjee's Question No. I.”

## BASIS OF DIAGNOSIS IN SUSPECTED PLAGUE CASES

The Hon'ble BABU NORENDEA NATH SEN said—

Dr Cook, the present Health Officer of Calcutta, has recently declared that bacteriological examination, even in undoubted cases of plague, does not give positive results. If so, on what was the diagnosis of the cases, reported as plague, based?

The Hon'ble MR RISLEY replied —

“The statement alleged to have been made by Dr. Cook has been imperfectly understood. What he meant was that while the discovery of the bacillus in a doubtful case would prove it to be a case of plague the fact that the bacillus was not found in an undoubted case would not prove the case not to be one of plague.”

"The diagnosis of the cases reported as plague was based in the first instance on clinical symptoms, and was confirmed in thirty-five cases by bacteriological examination, and in about the same number by pathological appearances."

#### APPOINTMENT OF A BACTERIOLOGIST FOR CALCUTTA.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether a competent bacteriologist should not be employed permanently in Calcutta for making bacteriological examinations of the soil, water and air, and of specific diseases, whenever they break out?

The Hon'ble MR. RISLEY replied —

"The question of employing a bacteriologist permanently in Calcutta is under consideration."

#### CONTINUANCE OF PLAGUE EXPENDITURE

The Hon'ble BABU NORENDRA NATH SEN said—

Considering the erratic and somewhat fitful course pursued by the plague in Calcutta so far, and having regard to the smallness of the ravage done by the disease, both in seizures and mortality, and considering also that the citizens of Calcutta have cheerfully and loyally assisted the authorities, and have established and are maintaining ward, caste, and private hospitals out of their private purse, will the Government be pleased to state if it is still necessary to keep up the present heavy plague expenditure, knowing, as we do, that it must eventually fall on the rate-payers of Calcutta, unless the Government be pleased to bear a reasonable share of it?

The Hon'ble MR. RISLEY replied —

"In view of the possibility that plague may increase in the cold weather, it is not advisable at present to make any material reduction in the establishment employed on the prevention of plague."

#### DAMAGE BY FLOODS IN THE MIDNAPORE DISTRICT

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state what amount of damage has been done by the overflow of the river Cossye in the Midnapore district, and the flooding of the streams of Rupnarain and Damodar by the recent heavy rains, and how many human lives have been destroyed in consequence, and likewise what steps have been taken by the Government to afford succour and relief to the sufferers from the floods?

The Hon'ble MR. FINUCANE replied —

"Reports have been received by Government of extensive floods in the Midnapore district caused by a sudden rise in the river Cossye between the 16th and 18th of June. Exact details of destruction of life and private property have not yet been received, but the damage done to the Government embankments in the Ghatal subdivision and to the Midnapore Canal and its distributaries is estimated at two lakhs of rupees. The Collector reports that he has been distributing relief out of money at his disposal, and Government has also intimated its readiness to furnish further funds should they be required."

### PLAGUE INSPECTOR OF DACCA.

The Hon'ble MR RISLEY gave the following reply to Question No. III asked by the Hon'ble BABU SURENDRANATH BANERJEE at the Council meeting of the 16th April, 1898 —

“The name of the gentleman appointed as Plague Inspector of Dacca was Lomax, not Connan, as stated in my reply of the 16th April. He possessed no technical qualifications, nor were any required for the duties assigned to him. The pay of the post was Rs. 250. It has since been abolished and a Health Officer has been appointed under the Plague Regulations. The services of the Engineer Secretary were not dispensed with. He applied to the Commissioners for two years' leave without pay, and this was granted to him.”

### STATEMENT AS TO THE COURSE OF BUSINESS.

The Hon'ble THE PRESIDENT said:—“Gentlemen, I understand that it is the custom in this Council, at the commencement of each session, that the President should make a statement of the business before the Council. The statement on this occasion shall be a very short one. Two Bills will presently be brought forward for consideration, the object of which will be fully explained by the Hon'ble Member in charge. I may only very briefly say that the design of one of them is to shorten the language used in Bills and Acts of this Council, and the object of the other is to enable the Port Commissioners to give a higher insurance to the owners of goods conveyed by their railway to the docks. It may perhaps interest the Council if I should say, in a few words, in supplement to what has been said in answer to questions to-day, that for five consecutive days there has not been a single case of plague in Calcutta. I can only say that in these circumstances I personally regard the situation as most hopeful.”

### AMENDMENT OF THE CALCUTTA PORT ACT, 1890.

The Hon'ble MR RISLEY, moved for leave to introduce a Bill to amend the Calcutta Port Act, 1890, He said —

“The necessity for this Bill, which is somewhat of a technical character, arose from a change in the system of dealing with exports for shipment which was introduced in July, 1897. Up to that time the bulk of the exports for shipment not loaded in the stream was received in the jetties, and for every consignment of exports the shipper obtained a receipt which was treated by Steamer Companies practically equivalent to what is known as a Mate's receipt. It was expected that the goods thus delivered at the jetties would be put on board their steamers, and this receipt was accepted as sufficient to enable them to grant bills of lading on the goods, which were then negotiated in the ordinary way. When the goods had been received in the Port Commissioners' sheds the liability of the Commissioners' was, under section 112 of the existing Port Act, the liability of a bailee as defined in section 151 of the Contract Act, that is to say, they were expected to take as much care of the goods in their custody and charge as ordinarily prudent and reasonable men would take of their own property, and they were responsible only for any acts of neglect on the part of their servants which were proved against them. The goods while in the jetty sheds were insured by the shippers. In July, 1897, a great change took place. It was then ordered by the Port Commissioners as the result of a very elaborate discussion between them and the Chamber of Commerce as the representative of the mercantile community, that all exports should in future be shipped from the docks and not from the jetties. In the case of exports received direct at the docks no difficulty arose. The liability of the Port Commissioners in that case was precisely the same as it had been all along in respect of such exports when received at the jetties. But it was an essential part of the arrangement between the mercantile community and the Port Commissioners, it was a condition upon which the change was accepted as a beneficial and desirable change by the mercantile community that the Port Commissioners should accept absolute, unlimited liability for goods in transit between

the jetties and the docks. It was obviously for the convenience of shippers that they should not be compelled to cart their exports all the way to the docks themselves. It was agreed, therefore, that the Port Commissioners should accept these exports at the jetties in order to ship them from the docks, and that all the while during the transit from the jetties to the docks they should accept in respect of these goods not merely the limited liability of a bailee, but absolute liability for loss by fire or any other cause. Shortly after this change was made and this undertaking given by the Port Commissioners, the question of their powers under their own Act to accept this liability was raised, and it was held that they were not empowered to accept this liability at all, that section 112 did not enable them to go beyond the liability imposed on them as an ordinary bailee. They suggested, therefore, that the Act should be amended in order in the first place to meet this extended liability, and that was the immediate purpose of the present Bill. But Hon'ble Members to whom the Bill has been circulated will see that the amended section as it has been drafted goes a considerable way beyond what would be necessary merely for the purpose of enabling the Port Commissioners to assume full liability for goods in transit from the jetties to the docks. It enables them, with the previous sanction of the Local Government and under such circumstances and conditions as the Local Government may prescribe, to enter into agreements relating to animals or goods landed for import or received for export or for carriage by railway, which may impose upon the Commissioners a greater responsibility than that imposed by sub section (1), and every such agreement must be in writing and must be signed by or on behalf of the Port Commissioners. The reasons for going beyond the amendment necessary to meet the particular case are these: that the trade of Calcutta is developing considerably, that it is in many respects altering its channels, and it is impossible to foresee what its course may be in future. It will be exceedingly inconvenient if the trade were to take a turn which would require responsibility, other than that of an ordinary bailee, to be assumed in respect of classes of goods other than exports in transit from the jetties to the docks, and if in that case legislation had to be resorted to in a hurry. An illustration of this is the following case. Under section 113 of the Port Act, when goods are landed and notice is given to the consignee, the Port Commissioners are responsible for two clear days for whatever may happen to those goods. If within those two days the consignee does not remove the goods, he has to pay rent for storage room, and he also has to take responsibility for whatever may happen to the goods. In 1894, when the customs law had recently been changed, it was found impossible to clear goods within two clear working days, which were ordinarily accepted as what is called "free" days. The Port Commissioners, therefore, proposed to grant a third free day. Legal opinion was taken, and it was held by the Advocate-General that it was not in the power of the Commissioners to undertake the risk for a third day. This is the sort of case which this additional provision in the Bill ought to cover. Sub sections (2) and (3) of section 112, which are proposed to be inserted in the Port Act, have been framed so that in future the Port Commissioners may, with the previous sanction of the Local Government, and under such circumstances and conditions as it may prescribe, enter into special agreements of the kind there referred to, and every such agreement must be in writing and signed by or on behalf of the Port Commissioners. It is considered that this will be sufficient to prevent the Port Commissioners from assuming any undue liability. The opportunity has been taken to re-enact section 112 of the Port Act. That section of the present Act is imperfectly worded and is obscure, although legal authorities are understood to agree that it means merely that the Port Commissioners assume the liability of bailees under the Contract Act, but it is considered desirable to make the section perfectly clear and to refer also to the Railways Act of 1890, because the Port Commissioners act as a railway when transporting exports from the jetties to the docks, and in certain cases in sending imports from the docks to the jetties.

"I think this Bill is one which may be fairly accepted by the Council, and I understand that the commercial community are absolutely unanimous in desiring that it should be passed. The arrangements under which exports are now shipped from the docks and are excluded from the jetties was the subject of much controversy at the time, and it was accepted by the shipping interest on

the strength of the promise given by the Port Commissioners that they would accept the further liability which the Bill enables them to undertake."

The Motion was put and agreed to.

The Hon'ble MR RISLEY further said.—"In order to expedite the passing of this Bill, I have the honour to apply to the President to suspend the Rules of business for the purpose of introducing the Bill."

The Hon'ble THE PRESIDENT said —"In a matter of this sort where we are asked to confirm an arrangement of a commercial character agreed to by all parties, I think we may safely depart from the usual procedure and reduce the proceedings by one stage. I accordingly suspend the rules of business for the purpose of introducing this Bill."

The Hon'ble MR RISLEY then introduced the Bill and moved that it be read in Council

The Motion was put and agreed to, and the Bill was read accordingly.

### BENGAL GENERAL CLAUSES BILL.

The Hon'ble SIR CHARLES PAUL moved for leave to introduce a Bill for further shortening the language used in Bengal Acts, and for other purposes. He said —

"This Bill, is generally known as the Bengal General Clauses Act, and it indicates by its own designation its distinctive character. It defines once for all a number of expressions commonly used in the Acts of this Council. It enacts various rules of construction and common clauses, which are frequently required for interpretation in the working of legal enactments. For instance, in the 'general definitions' take the definition of 'immovable property' The Bill says 'immovable property shall include all benefits that arise out of land and things attached to the earth or permanently fastened to anything attached to the earth.' By making a definition of immovable property, in any reference to the subject-matter which it includes, it is not necessary to name the various matters which it includes, but it will suffice to say that it includes all this. It, therefore, greatly lessens the cumbrous wording of the statute. Again, when in any Act a word in the singular is mentioned, it includes the plural, otherwise, in enacting a section, instead of only saying "any person," you would have to say 'any person or persons.' Take another instance. Permission is given to the Government to make rules and then to modify them, but the power once taken advantage of is gone. Rules once made, no further rules can be made, unless you add the word 'from time to time,' but under this Bill if those words are not mentioned it will be implied. If Hon'ble Members will look through this Bill, they will find a great many matters in regard to which the language of Acts will be shortened and their meaning made distinct. The reasons for this Bill are very fully stated in the Objects and Reasons. I need not, therefore, take up the time of the Council in putting other cases to illustrate the advantages to be derived from this Bill, which, however, is a Bill more or less of a formal character."

The Motion put and agreed to.

The Council was adjourned to Saturday, the 30th instant.

CALCUTTA,  
The 2nd August, 1898.

F. G. WIGLEY,  
Offg. Asst. Secretary to the Govt. of Bengal,  
Legislative Department.

*Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.*

THE Council met at the Council Chamber on Saturday, the 30th July, 1898.

**Present.**

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate General, *presiding*

**LEASING OUT POUNDS.**

The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR asked —

Is the Government aware that under the existing practice of leasing out pounds to the highest bidders by auction, which obtains in almost all the districts of Bengal, the cattle while thus impounded not only suffer from neglect, but are positively starved by most of the pound-keepers? Is it not a fact that the practice has also in certain places resulted in the establishment of hired agencies by the pound-keepers for the wrongful impounding of cattle to make up their losses and secure a margin of profit upon the amount paid to the District Boards at the time of auction. If, however, the sum received on account of fines and the unclaimed proceeds of the sale of the cattle be applied to the maintenance of an establishment with fixed salaries, as contemplated by section 18 of the Cattle Trespass Act and section 56 of the Bengal Local Self-Government Act, could not the wrongful impetus now given to the pound-keepers by the auction system be materially lessened and thereby a standing source of grievance of the cultivators of Bengal removed? Will the Government therefore be pleased to institute an enquiry through the District Officers into the above and ascertain whether it is not desirable to introduce the system suggested above, which is not only compatible with the letter of the law as at present laid down, but in harmony with the spirit of the legislation referred to?

The Hon'ble MR. RISLEY replied:—

"No complaint has reached the Government of the ill-treatment of cattle by pound-keepers, nor has any instance of the employment of an agent for the wrongful impounding of cattle been brought forward. On the introduction of the Local Self-Government Act, the management of pounds was transferred to the District Boards, who have power either to let them in farm or to manage them through their own servants. In 1891 and 1892 the administration of pounds in Bengal formed the subject of a searching enquiry, and it was then shown that the discontinuance of the farming system would deprive the District Boards of net revenue amounting on a moderate estimate to between two and three lakhs of rupees; while it was doubtful whether the change would put a stop to the evils alleged to exist under the farming system. At the same time orders were issued providing for—

- (a) the regular and systematic inspection of pounds by the officers of Government and of the District Boards,

- (b) the grant of leases for a longer period than one year to persons of known solvency and respectability, residing in the neighbourhood of the pound leased,
- (c) an alteration in the form of agreement, so as to define better the District Board's power of control, and lastly
- (d) the introduction of such registers and forms of receipt as would enable a proper check to be kept over the pound-keepers, without making unduly close enquiry into the amount of the farmer's profits when the pounds are let in farm.

"Failing specific evidence of actual abuses, there do not appear to be sufficient grounds for further enquiry or for interfering with the discretion now vested in the District Boards."

#### AMENDMENT OF THE CALCUTTA PORT ACT, 1890.

The Hon'ble Mr RISLEY moved that the Bill to amend the Calcutta Port Act, 1890, be referred to a Select Committee consisting of the Hon'ble Mr. Oldham, the Hon'ble Mr. Turner, the Hon'ble Mr. Spink, and the Mover

The Motion was put and agreed to.

#### BENGAL GENERAL CLAUSES BILL.

The Hon'ble SIR CHARLES PAUL introduced the Bill for further shortening the language used in Bengal Acts, and for other purposes, and moved that it be read in Council

He said.—"Last Saturday I explained to the Council the objects and reasons for introducing this Bill. It is a very necessary and useful measure and I trust the Council will allow the introduction of this Bill."

The Motion was put and agreed to, and the Bill was read accordingly.

The Council adjourned to Saturday, the 13th August, 1898.

CALCUTTA,  
The 10th August, 1898 }

F G WIGLEY,  
Offg. Asst. Secy. to the Govt. of Bengal,  
Legislative Department.

## RESOLUTION ON THE INLAND EMIGRATION REPORT FOR 1897

## GENERAL DEPARTMENT—EMIGRATION

*Calcutta, the 2nd August 1898*

RESOLUTION—No 2421

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1897

THE appointment of Superintendent of Emigration was held by Dr Macleod from the 1st January to the 14th February, by Dr W Foisyth from the 15th February to the 15th May, and by Dr. C. Banks from the 16th May to the end of the year.

2 In consequence of the prevalence of cholera amongst emigrant coolies, Surgeon-Captain J C Vaughan was appointed temporarily in March 1897 to be an Assistant Superintendent of Emigration within the territories administered by the Lieutenant Governor. The period of his appointment lasted until the 3rd August 1897.

3. The report, which is in the usual form, traces the journey from the recruiting grounds to the labour districts of each class of emigrants by the recognised methods of recruitment—

- (a) by licensed contractors,
- (b) by local agents of the employers of labour,
- (c) by garden sardars;
- (d) by the free system.

While recognising the value and importance of the detailed figures and accounts tracing the history of each emigrant to his place of destination, the submission of which cannot be dispensed with, the Lieutenant-Governor would be glad if in future reports an attempt could be made to embody in the annual account of emigration, something more than statistical statements, which are practically all that the present report contains. During the year under review many important matters of interest formed the subject of discussion between the Superintendent, the Tea Association and Government, and he would have been glad to have received a brief *resumé* of the questions discussed, the orders passed on them, and the results attained.

1 *Contractors' Emigrants*—Three licensed contractors maintained dépôts in the Suburbs of Calcutta during the year, employing 15 recruiters, against 12 in the preceding year, who registered between them 5,227 coolies, against 4,164 in 1896. Of these all but 55 were registered in the 24-Paiganas, which shows clearly, as was noticed last year, that contractors depend largely on the numerous free emigration dépôts in Calcutta for their supply of labour. Of the coolies registered 63 per cent were natives of Bengal, 18 per cent came from the Central Provinces, 14 per cent from Central India, 1 per cent from the North-Western Provinces, and only 0.76 per cent from the congested districts of Bihar. These details, however, are based on the statements of the emigrants themselves, and cannot be regarded as absolutely correct. Out of 5,227 emigrants 5,223 arrived in the Calcutta dépôts, their numbers being diminished by one desertion, one death, and two releases. To this number must be added 155 coolies who were already in the dépôts on the first day of the year, and four children who were born in them, raising the total number of persons accommodated in the dépôts to 5,382. Of these, 117 were discharged, 200 deserted, 37 died, and 99 remained over in the dépôts at the close of the year. The percentage of sickness during 1897 rose as high as 1.82 against percentages of 0.42, 0.26, and 0.86 in the three previous years, while the death rate per mille was 6.87 against 1.41. These figures show a considerable increase in both sickness and mortality during the past year. No case of small-pox or of chicken-pox occurred during the year, and although there were some cases of measles, there were no resulting deaths. Cholera broke out in one dépôt at Intally, causing 15 deaths. The dépôt was at once closed for a month and disinfected, while certain structural improvements were made; no fresh outbreak of the disease occurred after it was re-opened. The unusual prevalence of sickness in all the dépôts is attributed to the scarcity and high prices of food-stuffs. The emigrants not only

increased in numbers, but arrived at the depôts in generally poor health and lowered physical condition. The percentage of contracts for four years on the total number of contracts registered rose to 81 as against 46 in the previous year.

The emigrants despatched to Goalundo numbered 4,950, including the 78 who were despatched from Calcutta on the 31st December 1896. Of these, 3,467 emigrants were landed in Assam and 1,470 in Sylhet and Cachar.

5 *Special Local Agents*—Eight special local agents were licensed, against seven in the previous year. Their recruiting operations, which were confined to the districts of Manbhum, Lohardaga, and the Sonthal Parganas, resulted in the enlistment of 15,471 emigrants, or an average of 1,933 to each agent, against 1,134 in the previous year. This large increase is attributed to the prevailing scarcity, which made people more willing to leave their homes. The proportion of labourers to dependants was approximately two to one. Of the entire number, Manbhum contributed no less than 73 per cent, Lohardaga 24 per cent., and the Sonthal Parganas 2 per cent. Of the total number of emigrants, 13,998 were registered for Assam, 915 for Cachar, and 558 for Sylhet. Of these 11,983 were despatched to Goalundo, where they arrived without casualty, while at Goalundo there were 31 releases, 2 desertions and 12 deaths, thus reducing the number of emigrants to 11,938, of whom 9,967 were embarked for Assam, 905 for Cachar, and 1,066 for Sylhet. Of the number despatched to Assam, 15 deserted and 69 died, 63 of the deaths being due to cholera—a lower percentage, however, than in the previous year. There were two deaths among the coolies despatched to Cachar. No casualty occurred among the emigrants embarked for Sylhet. Fifty-one emigrants left for Assam via Dhubri, and duly arrived at their destination.

YEARS	Number of—		Local agents
	Sardars	Sardarnis	
1893	4,762	104	127
1894	5,274	166	138
1895	5,317	164	172
1896	4,748	73	164
1897	4,439	65	119

sardars and 65 sardarnis, against 4,748 sardars and 73 sardarnis in 1896. The marginal table gives the number for each of the last five years, the decrease during the last two years has not been accompanied by any decrease in the numbers of emigrants registered, which have in fact largely increased. No licenses of local agents were cancelled, but 14 certificates of garden sardars were withdrawn at the instance of the managers. The number of coolies registered by garden sardars and sardarnis amounted to 18,775 and 184, against 9,037 and 93 in the previous year. This large increase is obviously attributable to the scarcity and high prices which, as has been noticed, increased emigration by other methods. But whereas the number of emigrants registered in Bengal was greater by 9,831 than in the previous year, the increase being specially remarkable in the districts of Hazaribagh, Manbhum, and Lohardaga, the numbers registered in Bihar decreased by 2. It may be inferred, therefore, that the relief works organised in the area actually stricken by famine, completely effected their purpose. Of the 18,959 emigrants, 15,931 were registered for Assam, 988 for Cachar, and 2,040 for Sylhet. The total number of emigrants who left the districts of recruitment during the year for embarkation at Goalundo was 21,116, of whom one was released and 35 died at Goalundo. Of the remaining 21,100, 17,267 were embarked for Assam, 1,674 for Cachar, and 2,159 for Sylhet. After leaving Goalundo, there were 169 deaths and 10 desertions among the Assam coolies, thus reducing the number of emigrants who arrived at their destinations to 17,088, while 3,821 reached Cachar and Sylhet after losing 11 by death and one by desertion. Out of 6,726 sardari emigrants who were despatched to Assam via Dhubri, 148 died and 11 deserted previous to embarkation, while 150 emigrants were subsequently landed on account of sickness, and 71 died.

7 *Free Emigrants*—The figures as to free emigration, which are only approximately accurate, are derived from information received from the Emigration Agents at Goalundo and Dhubri as to the numbers passing through these ports. Their reports show that 46,910 free emigrants left the recruiting districts for Goalundo and 7,994 for Dhubri, giving a total of 54,904 against 59,014 in 1896. It is noticeable that while emigration under all other methods has increased, the numbers of free emigrants has declined, though still

considerably in excess of 44,960, the figure during 1895. Di Banks has not specially dealt with this point, but it seems probable that in a season such as that of 1897, larger numbers of intending emigrants were anxious to avail themselves of the help on the road, which is provided by the Emigration Agencies. Of those travelling *via* Goalundo, 50 deserted, 78 died, and 69 were released on the way to, and at, Goalundo, the total casualties being 197, compared with 63, during 1896. Of the remaining 46,744 emigrants, adding one child born on the way to Goalundo, 22,707 were bound for Assam, among whom there were 4 desertions and 80 deaths against 60 in the previous year. Of the 8,280 and 15,757 free emigrants embarked for Cachar and Sylhet, 8,277 and 15,741 respectively reached their destinations. Out of 7,994 free emigrants who were despatched to Dhubri, 7,807 eventually arrived, the casualties numbering 187, against 224 in the previous year. In addition to this number, 19,759 free emigrants who embarked at Goalundo were landed at Dhubri for the purpose of executing contracts, bringing the actual number of arrivals at Dhubri to 27,566. Of the number embarked at Dhubri 25,963 executed labour contracts, and the 1,130 proceeded as free emigrants. Among these there were two desertions, 246 were landed *en route* on account of sickness, and 108 died, or a percentage of total casualties slightly higher than in 1896.

8 *Execution of Contracts.*—The following statement gives the figures connected with the execution of contracts under the Assam Labour and Emigration Act, 1882 —

PLACE	THREE YEARS				FOUR YEARS				GRAND TOTAL
	Contractors' coolies	Special local agents' coolies	Garden sardars' coolies	Total	Contractors' coolies	Special local agents' coolies	Garden sardars' coolies	Total

Total for 1896	1,030	187	943	2,760	1,406	5 516	4,607	11,723	14,483

23,873 contracts were executed during the year, of which 41 per cent were for three years, and 59 per cent. for four years. In 1896 the number was 14,492, of which 19 per cent were for three years and 81 for four years. Taking the figures for Assam, Cachar and Sylhet separately, 39 and 61 per cent of the Assam contracts were for three and four years respectively. Of those for Cachar, 40 were for three and 60 per cent for four years, while for Sylhet 66 per cent were for three and 34 for four years.

9. *Offences connected with emigration and inspection of depôts* —The quarterly returns of offences connected with emigration submitted by District Officers, and their annual reports of inspection of cooly depôts, are dealt with separately, and need not be noticed here.

10. *Summary.*—The following table summarises the statistics of emigrants registered to proceed during the year from the recruiting districts to the labour districts in Assam *via* Calcutta, Goalundo and Dhubri —

	1898				1897			
	<i>Via</i> Calcutta	<i>Via</i> Goalundo	<i>Via</i> Dhubri	Total	<i>Via</i> Calcutta	<i>Via</i> Goalundo	<i>Via</i> Dhubri	Total

<sup>a</sup> A B — these figures include the free emigrants who were landed at Dhubri for execution of contracts

The number recruited under the free system, though greater than the number recruited under the other systems put together, was smaller than in the previous year, emigration under all other methods of recruitment increased. The result of the year's operations shows that the number embarked for the labour districts in Assam in 1897 amounted to 99,011, including the number left over in the previous year, against 84,717 in 1896, an aggregate increase very much smaller than might have been anticipated in all the circumstances of the year.

11 *Transport*—Special attention was given during the year to the accommodation and feeding of emigrants during their voyage on the river steamers, and it is reported that all suggestions for improvement were promptly carried out by the Companies concerned. Dr Banks in commenting upon the mortality from cholera, which, while not excessive, still bears a high proportion to the cases attacked, remarks that a less fatalistic method of treatment by the medical officers concerned might lead to a larger percentage of recoveries. The average length of the river journey to Assam is now from seven to eight days, and to Cachar and Sylhet from three to four days. The Lieutenant-Governor observes that out of the batch way-bills of emigrants proceeding *via* Goalundo only 86 per cent and of those covering emigrants *via* Dhubri only 78 per cent were eventually returned to the Superintendent. Although the figures show some improvement over those of the previous year, yet seeing that the return of these documents is prescribed by rule, and that they form the principal source of information as to the casualties occurring *en route* after the coolies are once landed, the Lieutenant-Governor would like the Superintendent of Emigration to report whether it is not feasible to ensure the return of a larger proportion.

12 *Casualties*.—With the increase in the number of emigrants despatched to the labour districts during the year under report, there has been also an increase in the total number of casualties, which amounted to 2,507, or 2.53 per cent, against 1,623, or 1.89 per cent, in 1896. Deaths from cholera amounted to 99 per cent, against 58 in the preceding year, while the mortality from other causes rose from .09 per cent. in 1896 to .12 per cent in 1897. The number of casualties amongst free emigrants increased from 1.79 per cent. in 1896 to 2.53 per cent in 1897. The number of deaths amongst this class of emigrants was greater by 243 than in the previous year, being 98 per cent in 1897 against 50 per cent. in 1896.

13 *General*—The subject of the general improvement of the conditions of emigration continues to occupy the attention of Government, and, as noted in the Resolution of the previous year, the report of the Labour Enquiry Commission was submitted with the views of Sir Alexander Mackenzie to the Government of India in December 1896. The matter is still under the consideration of that Government in connection with the amendment of Act I of 1882, but it is hoped that early conclusions may now be arrived at on the very important recommendations of the Commission.

14. Pending the decisions of the larger issues as to the amendment of the existing law, the improvement of the arrangements under the rules now in force has formed the subject of discussion. In addition to the measures mentioned in last year's Resolution as having been adopted on Dr Vaughan's recommendations, the rules under Act I of 1882 and Act I (B C) of 1889 have now been revised, and a scheme devised for controlling the passage of emigrants with a view of securing a steady and regulated flow of traffic, and avoiding the periods of overcrowding which are liable to occur under the present system. The main feature of the scheme is the restriction of emigration under ordinary conditions to two main routes,—the one *via* Goalundo by which the majority of emigrants will travel, and the other *via* Jatrapur for the special convenience of coolies proceeding from districts north of the Ganges. When emigration has thus been brought into two main streams, over which a more efficient supervision can be exercised, it is proposed to have regular telegraphic communications between the different prescribed halting places, by which it will be possible to delay the departure of batches of coolies from one stage, until accommodation for their reception is ready at the next

The halting places will be selected at suitable stations with regard both to healthy accommodation and to the length of the journey. The introduction of the scheme has been delayed by the necessity for discussion with other Provinces, but the general assent of the Administrations of Assam and the Central Provinces has now been given, and as the rules were originally framed in consultation with the representatives of the Tea Association, the Lieutenant-Governor expects that the revised rules may obtain the approval of the Government of India before the next emigration season. Schemes for the segregation of infected batches of coolie emigrants and for the inoculation of emigrants against cholera are also being discussed in consultation with the Chief Commissioner of Assam, the Bengal Chamber of Commerce, and the Indian Tea Association. With the introduction of these measures, Sir John Woodburn hopes to see the rates of sickness and mortality among emigrant coolies reduced. The success of some of the proposals under consideration will depend upon the voluntary co-operation of the parties concerned, and he does not doubt that this will be willingly accorded, as the object which it is sought to attain is to the common advantage of all persons interested.

15. The survey of three several projects for the opening of the Chota Nagpur country by railway has been sanctioned by the Government of India, and is now being carried out. The completion of a railway in these regions will undoubtedly facilitate the supply of labour to Assam.

16. The thanks of the Lieutenant-Governor are tendered to Dr. Banks for the efficient and zealous discharge of his duties as Superintendent of Emigration, and to Dr. Vaughan for the thorough manner in which he performed the duties assigned to him and for the valuable suggestions he made towards securing the improved health and comfort of emigrants.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

## REVENUE DEPARTMENT—(LAND REVENUE)

### NOTIFICATION—No 2648 L.R.

*The 6th August 1898*—In exercise of the powers vested in him by sub-section (3) of section 1 of the Chota Nagpur Commutation Act IV (B O) of 1897, the Lieutenant-Governor is pleased to declare that the Act shall come into force on the 10th August 1898

M FINUCANE,  
Secy. to the Govt. of Bengal

## NOTIFICATION—No. 2649L R

The 9th August 1898—Under sub-section 5, section 14 of the Chota Nagpur Commutation Act IV (B C) of 1897, the following rules are published for general information

M FINCANE

Secy to the Govt of B. and

**RULES UNDER SECTION 13 OF THE CHOTA NAGPUR COMMUTATION ACT, IV (B C) OF 1897**

*Powers of Officers*

1 In carrying out their duties under this Act, Revenue Officers shall have regard to the instructions of the Board of Revenue for the guidance of Revenue Officers so far as such instructions are consistent with the rules hereby prescribed

2 In the performance of their duties under this Act, Revenue Officers shall, except where otherwise provided for by law, or by these rules, be subject to the general direction and control of the Commissioner of the Division and of the Board of Revenue, and Revenue Officers other than District Officers shall, except when it is otherwise ordered by the Board of Revenue, be subject to the general direction and control of the District Officers

3 Every Revenue Officer appointed under this Act is vested with—

- (a) All the powers of a Civil Court in the trial of suits so far as they are required for the purpose of making enquiries under the Act
- (b) Any power exercisable by any officer under the Bengal Survey Act, V of 1875

*Service of notices under section 4*

4 Service of notices under section 4 of the Act shall ordinarily be effected in the manner prescribed for the service of a summons on a defendant by Act I (B C) of 1849 or other law locally in force

*Rules for the preparation and publication of records under Chapter II*

5 The following processes will ordinarily be comprised in preparing a record of predial conditions or services attaching to lands, and in making a commutation of such conditions or services—

- (1) Identification of lands
- (2) Preparation of preliminary record
- (3) Attestation of the preliminary record and ascertainment of existing rents
- (4) Commutation of predial services or conditions
- (5) Preparation and publication of the draft record
- (6) Disposal of objections
- (7) Final publication of the record

6 If the local area of an estate for which the notification is issued under section 5 of the Act exceeds the area of a village, according to the revenue survey, the record shall be prepared for each such village. If it does not exceed such an area, the record shall be prepared for such local area or estate as is included in the notification

7 When the landlord and tenant are agreed as to the lands which are subject to predial conditions or services, the lands shall be entered in the record according to such agreement

8 If there is a dispute as to such lands, the Revenue Officer shall, after due enquiry, determine what lands shall be entered as subject to predial conditions or services

9 If it be necessary for the purpose of identifying such lands, a map of the village, local area or estate may be prepared. It shall show the boundaries of all lands subject to predial services or conditions, and such other particulars as the Board may prescribe

10 There shall be no measurement of lands or preparation of a map except under the orders of the Deputy Commissioner

11 The record to be prepared under section 6 of the Act shall show for each village, local area or estate, the following particulars—

- (a) The pargana and thana
- (b) The name and residence of each landlord
- (c) The name, parentage, caste, and residence of each tenant
- (d) The rent payable for the lands held by him at the time the record is being prepared
- (e) The lands, if any, subject to such predial conditions or services
- (f) A short description of such conditions or services
- (g) Commuted rent, if any, fixed for such conditions and services
- (h) Total money-rent fixed for each tenant.

12 When the records referred to in rules 7 to 9 have been prepared, the Revenue Officer shall issue a notification fixing a day and place on and at which he will be present to attest and complete the record. Provided that no such date shall be less than one week from the date of the issue of the notification in any such village, nor shall any such place be more than three miles distant from any such village. The notification shall require all parties concerned to attend at the time and place specified, with statements of their respective claims and such evidence as they may have to offer in connection with the proceedings

13 Such notification shall be published by proclamation and beat of drum, and by posting it in the presence of not less than two respectable inhabitants in some conspicuous place in each village to which it relates

14 The Revenue Officer may also, at this or any other stage of the proceedings, take such additional measures, under the powers conferred on him by rule 3 above, as may seem to him necessary, to procure the attendance, at any time and place fixed for the enquiry, of any witness or the production of any evidence that may appear to him desirable

15 On the date specified in the notification to be issued under rule 13, or on any other date to which the proceedings have been adjourned, the entries which have been recorded for each tenant shall be read out in the presence of such of the interested parties as are in attendance. The particulars as to the predial conditions and services, to which any lands are subject, and the existing rent of the tenant's holding shall be summarily ascertained and entered. If the correctness of any entry or the omission of any entry is disputed, the Revenue Officer shall enquire into and summarily dispose of any matter in dispute, after recording, if necessary, the evidence tendered on either side and making such further local or other enquiry as he may deem desirable to enable him to come to a correct finding. He shall record a separate proceeding in each case of dispute

16 The Revenue Officer shall then, if required, proceed to fix the rent which shall be deemed payable in respect of such predial conditions and services, and shall enter it and the total rent of the holding so ascertained on the preliminary record

17 When the entries have been made and attested in accordance with the preceding rules, the Revenue Officer shall record a proceeding in which he shall state that the attestation of the preliminary record is complete, and shall prepare the draft of the record required by section 6 of the Act in the annexed form

18 On completion of the draft record in the manner directed above, the Revenue Officer shall cause a notice to be published in the village by beat of drum, and to be posted in the landlord's village office, or in the presence of not less than two persons in some conspicuous place in the village, stating that the draft of the record will be published on a day to be specified not less than a week from the date of such notice, and calling on all persons interested to attend on the date so specified

19 On the date fixed for draft publication, the Revenue Officer shall either proceed to the village himself, and read out the contents of the record in the presence of the parties who attend, or he shall depute an officer, not below the rank of kanungo, who shall read out the contents of the record in the presence of so many of the parties as attend, and the Revenue Officer, or officer deputed by him, as the case may be, shall at the same time inform the parties who attend that the draft record will be open for inspection for not less than one month in the office of the Revenue Officer, or in such other convenient place as the Revenue Officer may determine. The Revenue Officer shall receive and consider any objection which may be made to any entry in the record or to the omission of any entry therefrom during the period named

20 When an objection is made before the expiry of the period of publication of the draft record prescribed under rule 19 above, regarding the correctness of an entry in the record or the propriety of any omission therefrom, notice of the objection shall be served on all persons whose interests may, in the opinion of the Revenue Officer, be affected thereby, and they shall be called upon to attend at such time and place as the Revenue Officer may fix for the disposal of the objection. If the objection is contested, the Revenue Officer shall enquire into the case, and after taking evidence, if necessary, or making such enquiry as he thinks necessary, shall dispose of it as provided in rule 16. If no person attends to contest the objection, the record may be amended accordingly, or the person who made the objection may, if the Revenue Officer thinks fit, be called upon to produce evidence in support of his objection

21 When all objections have been disposed of by the Revenue Officer, he shall record such corrections and additions, if any, as are required to carry out the orders passed in regard to these objections. He shall then finally frame the record, and cause it to be published by notifying that its contents will be read out in the village on a date to be specified not less than a week from the date of such notice, and by reading it out himself or causing it to be read in the village on the date so specified, in the manner prescribed in rule 19 in the presence of the parties or of so many of them as attend.

22 (a) The Revenue Officer having completed the record shall cause copies of it to be made, one of which, or extracts from which, will be made over to the landlord concerned or, where there are more landlords than one, to their common agent or common manager, as the case may be, and one to the Deputy Commissioner of the district.

(b) An extract from the record relating to his tenancy shall be given to every tenant under the seal of the Revenue Officer, and under the signature of an officer duly authorised by the Revenue Officer to give copies.

(c) Copies of the record or of extracts from the record supplied to landlords and tenants under this rule shall be given free or on payment according as, in the case of each local area, the Local Government may direct. When payment is required, the sums so recovered shall be adjusted against the expenses incurred on account of preparing the record.

23 The Local Government may, if it thinks fit, direct that a final report be written in English for each local area, estate or village for which a record has been prepared. The report will show—

- (a) The number of tenants in such area and the total area of lands held by them, distinguishing those subject to predial conditions and services and those not subject
- (b) A description of the predial conditions and services and of the method in which their value has been commuted, if commutation has been ordered
- (c) The rents payable by the tenants before and after commutation
- (d) Any other facts deserving of notice affecting the area for which a record has been prepared
- (e) The costs of preparing the record in accordance with these rules

If the area for which the record has been prepared exceeds the area of a village, a general report may be prepared as above for the whole area

## RULES AS EXISTING AND IN FORCE

11 Leases under rule 6—I, II, III, IV and V, will only be entered into with (I) the zamindar or subordinate proprietor of the village, or (II) with a body of cultivators not exceeding six in number, who will agree to represent the cultivators, and who will be jointly and severally responsible for the payment of the water-rates due under the lease. The persons who sign the lease will be entitled to a deduction of 12½ per cent on all payments made within one month of the water-rates becoming due. If the lessee is not the zamindar or talukdar, a moiety of the amount due for the first year will be payable in advance. Leases under rule 6—VI, will be entered into with representatives of the actual cultivators.

## RULES AS NOW PROPOSED

12 Leases under rule 6—I, II and III, will only be entered into with (a) the zamindar or subordinate proprietor of the village, and (b) with a body of cultivators not exceeding six in number, who will agree to represent the cultivators, and who will be jointly and severally responsible for the payment of the water-rates due under the lease. Leases under rule 6—IV, will be entered into with representatives of the actual cultivators.

The persons who sign the lease under rule 6—I, II, III and IV, will be entitled to a deduction of 12½ per cent on all payments made within one month of the water-rates becoming due. If the lessee is not the zamindar or talukdar, a moiety of the amount due for the first year will in the case of long and season kharif leases be payable in advance.

13 When it comes to the knowledge of the Sub-divisional Canal Officer that canal water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Divisional Officer who shall, if he is of opinion that the fields can be legally assessed, fix the rate at which the assessment is to be made and return the record with his orders passed thereon to the Sub-divisional Canal Officer. No assessment under section 79 of Act III (B.C.) of 1876 is to be made without the written orders of the Divisional Canal Officer, and no rates shall be imposed for unauthorized irrigation on lands irrigated without permits beyond the area shown as commanded on the map filed in the Collector's Office under Rule 1.

14 Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st of June next following.

15 Remission of water-rates, either in whole or in part, as the case may require, shall be granted by the Divisional Canal Officer for—

I—Errors in the assessment of rates.

II—Injury to the crop on a leased area caused by deficient supply of water, provided that a written application for remission has been made 15 days at least before the crop is cut.

16 Remissions on other grounds than the above require the sanction of Government.

17 In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as unrecoverable on the authority of the Superintending Canal Officer.

18 No cross dams other than those the erection of which has been sanctioned as a permanent arrangement will be allowed without the written order of the Divisional Canal Officer. Every cross dam must be provided with a suitable and efficient escape, so that the flow of the water in the channel may not be interfered with.

19 The Canal Officer will not interfere with the fishery rights hitherto exercised by the proprietor of the river beds, but no stakes shall be allowed to be fixed for the purpose, excepting on and from the 1st of February to the 31st of March, and then only in such a way as not to interfere with the flow of the water.

12 No cross dams other than those the erection of which has been sanctioned as a permanent arrangement will be allowed without the written order of the Divisional Canal Officer issued with the written approval of the Collector. Every cross dam must be provided with a suitable and efficient escape, so that the flow of the water in the channel may not be interfered with.

13 The Canal Officer will not interfere with the fishery rights hitherto exercised by the proprietors of the river beds, but no stakes shall be allowed to be fixed for the purpose, excepting on and from the 1st of February to the 31st of March, and then only in such a way as not to interfere with the flow of the water.

## RULES AS EXISTING AND IN FORCE.

## RULES AS NOW PROPOSED

20 Tanks may be filled with canal water without charge, wherever water can be made available without injury to the cultivation dependent on a canal under the following conditions —

- I.—No tank shall be filled unless the water is to be exclusively used for domestic purposes or for watering cattle
- II.—No tank shall be filled from which irrigation is practised
- III.—No tank shall be filled which intercepts any line of drainage or is liable to overflow from the accumulation of water from natural causes
- IV.—No tank shall be filled except on the written order of the Sub-divisional Canal Officer issued on the written application of the persons concerned
- V.—No tank shall be filled unless the village channel used to convey water to it shall be shown to the satisfaction of the Sub-divisional Canal Officer to be in a sound condition when the application is made
- VI.—The privilege here accorded may, by the written order of the Sub-divisional Canal Officer, be suspended for twelve months for the breach of any of the above rules

21 When tanks which are used both for irrigation and domestic purposes are filled with canal water, a charge of Rs 25 will be made for each small village and of Rs 50 for each large village in which the tanks are filled

22 The Divisional Canal Officer may supply water for manufacturing or other purposes, and charge for the same at the rate of one rupee for each 10,000 cubic feet or part of 10,000 cubic feet supplied. The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner

23 No person shall, without the permission in writing of the Divisional or Sub-divisional Canal Officer, pass or cause any animal or vehicle to pass on or across any of the works, banks or channels of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords and ferries and their approaches as are provided by the Divisional Canal Officer

24 No officer employed on the canals, unless especially exempted by the Lieutenant Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another or jointly, or in shares with others

25 Except as provided in the Act and in these rules, no appeal shall lie from any order passed by a Canal Officer; but the Sub-divisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Sub-divisional Canal Officer or Divisional Canal Officer shall modify any orders passed by them in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

## Corporation of Calcutta

## LOAN NOTIFICATION

THE Commissioners of Calcutta are prepared, with the sanction of the Governor-General in Council given under Section 404 of Act II (B C) of 1888, to open a Debenture Loan for Rs. 80,00,000 (thirty lakhs) on the security of the rates, taxes and dues imposed and levied under the Calcutta Municipal Consolidation Act, 1888

2 The debentures will have a currency of (19) nineteen years from the 1st December 1898, and will bear interest at the rate of  $4\frac{1}{2}$  per cent per annum, payable on the 1st June and the 1st December of each year

3 The form of the debentures will be that given in the twelfth Schedule of Act II (B C) of 1888.

4 No debentures will be issued for any sum less than Rs 500, and above that amount debentures will be issued only for multiples of Rs 100.

5 Tenders for the whole or any part of the above loan of Rs 80,00,000 will be received by the Secretary to the Corporation up to 2 o'clock P M on Monday, the 29th August 1898

6 Each tender must be made out in the form annexed to this Notification, and enclosed in a sealed cover, addressed to the Secretary to the Corporation, and superscribed—'Tender for Municipal Loan of 1898 99'

7 Each tender must be accompanied by an earnest deposit in Government promissory notes, Calcutta Municipal debentures, currency notes or cheques for not less than 3 per cent of the amount tendered

8 When a tender is accepted, the earnest deposit, when made in currency notes or cheques, will be held as a payment in part of the amount tendered, and will bear interest at the rate of  $4\frac{1}{2}$  per cent per annum from the date of acceptance of the tender, provided that the whole amount tendered is paid up in the manner hereinafter prescribed, but no debenture will issue for the amount of the earnest deposit so long as the entire amount of the tender is not paid, but debentures may be issued for each instalment paid in full, the earnest deposit not being included in any but the last instalment.

9 The earnest deposits on tenders, which may not be accepted, will be returned on application, and no interest will be payable on such deposits. If an allotment after being made is not taken up, or the full amount allotted is not paid as hereinafter prescribed, the earnest deposit will be forfeited.

10 The rate at which a tender is made must be specified in rupees, or rupees and annas, but not in any fraction of an anna. If a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna. A tender in which the rate is not specified in rupees or rupees and annas will be rejected as null and void

11 The whole amount of each allotment will be divided into four equal instalments as follows, payable into the Bank of Bengal—

Instalment I As near as possible to 25 % payable on 17th September 1898

Instalment II As near as possible to 25 % payable on 3rd October 1898

Instalment III As near as possible to 25 % payable on 31st October 1898

Instalment IV. As near as possible to 25 % payable on 30th November 1898

(including earnest deposit if in currency note or cheque)

NB—The words "as near as possible" are used in this paragraph for the purpose of making each instalment an exact multiple of Rs 100 for debentures in excess of Rs 500.

12 Parties whose tenders are accepted will have the option of paying all or any of the instalments before the dates specified above and will receive interest from the date of such payment

13 Anticipation interest will be paid on all instalments from the respective dates on which such instalments are paid into the Bank of Bengal to the 30th November 1898

14 In the case of two or more tenders at the same lowest rate accepted, a *pro rata* allotment will be made, but no such allotment will be issued if the amount thus allotable on any tender is less than Rs 500.

15 A minimum having been previously fixed, tenders will be opened by the Loan Committee of the Commissioners at 2 30 P M on Monday, the 29th August 1898, at the Municipal Office

## The Indian Law Reports

Published under Authority

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay and Allahabad respectively.

In supercession of the previous advertisements, on and from the 1st January 1899 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876—

THE British Admiralty has given notice (No 350 of 1898) that information has been received that the light, shown from the extremity of the jetty (wharf) in Pakaeriki bay, is a *fixed green* light visible about 3 miles, with a *red* sector which is visible from about N E  $\frac{1}{2}$  N, to about N E  $\frac{1}{4}$  E. (from Green's point to just northward of the red buoy off that point)

Approximate position, lat  $43^{\circ} 49' 10''$  S, long  $172^{\circ} 58' 55''$  E.

(2) *Oamaru harbour—Alterations in positions of leading light beacons*

Also that the leading light beacons (*fixed green* and *fixed white* lights) at Oamaru have been moved to the eastward (but their exact positions are not known) and now bear when in line S  $\frac{1}{2}$  W, leading about 100 feet eastward of the mole in depths of 15 feet abreast of the spit and 16 feet off the mole end

These beacons are 180 feet apart.

Approximate position, lat  $45^{\circ} 6\frac{1}{2}'$  S., long.  $171^{\circ} 1\frac{1}{2}'$  E

[Second Publication.]

BAY OF BENGAL AND ARABIAN SEA.

*Alterations in storm signals at ports of India*

With reference to Notice to Mariners No. 108, dated the 30th April last, issued by this office, the British Admiralty has given further notice (No. 351 of 1898) that information has been received from the Government of India that, on 1st April 1898, the undermentioned system of storm signals was adopted at all the ports of India with the exception of those in the river Hugh, and with that exception the previous systems have been discontinued —

*Day signals.*

1. CAUTIONARY.—BAY OF BENGAL.—The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed squally weather in the Bay of Bengal, which may be the first stage in the formation of a cyclonic storm, and which, if it develops, is likely to affect that part of the coast on which the port, where the signal is shown, is situated.

**ARABIAN SEA** —The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed weather off the west coast of India near the port or ports where the signal is shown, or the advance of a cyclonic storm across Hindustan from the Bay of Bengal, which may shortly give squally or stormy weather in the Arabian sea.

In either of the above cases if the disturbed conditions pass away without producing stormy weather, the cautionary signal is hauled down, but if the disturbed weather will probably develop into a cyclone, signals indicating the probable position, character, and track of the approaching storm, are shown as follows

- 2 **WARNING SIGNAL** —A *ball* indicates that a cyclonic storm has formed, which will probably reach the port where the signal is shown, but is still at a considerable distance from it

The same signal will also be shown at more important ports on the west coast of India to indicate that a storm has formed in the Arabian sea at some distance from the coast and will shortly cross one or other of the tracks of vessels leaving those ports, but will not reach such ports. The Port Officer will receive details to communicate to vessels leaving the port

3. **DANGER SIGNALS** —(a) A *cone*, apex downwards, indicates that a cyclonic storm, probably slight to moderate, is affecting the port, and that its centre will probably cross the coast considerably to the southward

(b) A *cone*, apex upwards, indicates that the centre of such a storm as above (3 a) will probably cross the coast considerably to the northward

(c) A *drum* indicates that the centre of such a storm as above (3 a) will probably cross the coast over or near the port.

- 4 **GREAT DANGER SIGNALS** —(a) A *cone*, apex downwards, over a *ball*, indicates that a cyclonic storm of great intensity is affecting the port and that its centre will probably cross the coast considerably to the southward

(b) A *cone*, apex upwards over a *ball*, indicates that the centre of such a storm as above (4 a) will probably cross the coast considerably to the northward

(c) A *drum*, over a *ball*, indicates that the centre of such a storm as above (4 a) will probably cross the coast over or near the port.

#### \* Night signals.

- 1 No cautionary signals are shown at night
- 2 A *red* light indicates similarly to warning signal (2) above
3. (a) A *red* light, placed vertically over a *white* light, indicates similarly to danger signal 3 a, above
- (b) A *white* light, placed vertically over a *red* light, indicates similarly to danger signal 3 b, above
- (c) Two *red* lights, placed vertically, indicate similarly to danger signal 3 c, above
4. (a) Two *red* lights, placed vertically over a *white* light, indicate similarly to great danger signal 4 a, above
- (b) A *white* light over two *red* lights, placed vertically, indicates similarly to great danger signal 4 b, above.
- (c) Three *red* lights, placed vertically, indicate similarly to great danger signal 4 c, above.

AUSTRALIA, EAST COAST—BRISBANE RIVER

*Alterations in lights and beacons*

THE British Admiralty has given notice (No 359 of 1898) that the undermentioned information, dated 2nd May 1898, relating to lights and beacons in Brisbane river, has been received from Lieutenant and Commander C. W. S. Leggatt, R.M.S. *Goldfinch* —

- 1 A *fixed white* light is shown from West beacon, on the detached, dry bank at the western side of the entrance to the river

Approximate position, lat. 27° 21' 55" S, long 153° 10' 20" E

- 2 A *fixed white* light is shown from the white beacon situated S by W  $\frac{1}{2}$  W, distant  $3\frac{1}{4}$  cables, from the south-west angle of the Boatman's house enclosure, Lytton; and a *fixed red* light from the white beacon which in line with the first leads through Lytton reach in direction marked C on Chart

These beacons and lights would shortly be moved southward of their previous positions, and then in line would lead in the channel northward of Gibson island

3. Two beacons, the north-eastern (front) to show a *red* light and the south-western (rear) a *white* light, which in line would lead up Lytton reach, were in course of erection at the north-east end of Gibson island.
4. The lights (*red*, front, *white*, rear) previously shown from the beacons on the northern side of Lytton reach, opposite Gibson island, have been discontinued, and in lieu thereof two white beacons, the front one showing a *fixed red* light and the rear a *fixed white* light, have been erected on the south side of the river eastward of Queensport

These last beacons in line lead in the channel through Eagle farm flats

5. Also, that the western sides of Bulumba and Humbug reaches have recently shoaled considerably, for a distance of about 4 cables on each side from Humbug point, and a note to that effect has been placed on the Chart

*Reported rock above water.*

THE British Admiralty has given notice (No. 360 of 1898) that information has been received that the Master of the American Missionary steam-vessel *Morning Star* reports having passed, in lat  $7^{\circ} 32' N$ , long  $173^{\circ} 13' W$ , a ragged coral rock, about a quarter of a cable in extent, and 6 to 10 feet high

A rock, with the words "Bray rock, 6 to 10 feet high," written against it, has been placed on the Admiralty Chart in the above position

As islands had formerly been reported in this locality by whalers, viz, one in lat  $7^{\circ} 48' N$ , long  $173^{\circ} 12' W$ , and "Four rocks" in lat  $7^{\circ} 51' N$ , long  $176^{\circ} 6' W$ , it is probable that a reef exists in the vicinity, of which the rock reported is a head above water.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 0.03 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.6° higher, and, finally, 20 years and upwards is found to read 0.6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &amp;c, are deduced from the traces of the Barograph and Thermograph

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground.

## Corporation of Calcutta

## LOAN NOTIFICATION

THE Commissioners of Calcutta are prepared with the sanction of the Governor General in Council given under Section 404 of Act II (B C) of 1858, to open a Debenture Loan for Rs 30,00,000 (thirty lakhs) on the security of the rates taxes and dues imposed and levied under the Calcutta Municipal Consolidation Act, 1888.

1 The debentures will have a currency of (19) nineteen years from the 1st December 1893, and will bear interest at the rate of 4½ per cent per annum, payable on the 1st June and the 1st December of each year.

2 The term of the debentures will be that given in the twelfth Schedule of Act II (B C) of 1888.

3 No debentures will be issued for any sum less than Rs 500, and above that amount debentures will be issued only for multiples of Rs 100.

4 Tenders for the whole or any part of the above loan of Rs 30,00,000 will be received by the Secretary to the Corporation up to 2 o'clock P.M. on Monday, the 29th August 1898.

5 Each tender must be made out in the form annexed to this Notification, and enclosed in a sealed cover, addressed to the Secretary to the Corporation and superscribed—"Tender for Municipal Loan of 1898 99".

7 Each tender must be accompanied by an earnest deposit in Government promissory notes, Calcutta Municipal debentures, currency notes or cheques for not less than 2 per cent of the amount tendered.

8 When a tender is accepted the earnest deposit when made in currency notes or cheques, will be held as a payment in part of the amount tendered, and will bear interest at the rate of  $4\frac{1}{2}$  per cent per annum from the date of acceptance of the tender, provided that the whole amount tendered is paid up in the manner hereinafter prescribed, but no debenture will be issued for the amount of the earnest deposit so long as the entire amount of the tender is not paid, but debentures may be issued for each instalment paid in full, the earnest deposit not being included in any but the last instalment.

9 The earnest deposits on tenders, which may not be accepted, will be returned on application, and no interest will be payable on such deposits. If an allotment after being made is not taken up, or the full amount allotted is not paid as hereinafter prescribed, the earnest deposit will be forfeited.

10 The rate at which a tender is made must be specified in rupees, or rupees and annas, but not in any fraction of an anna. If a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna. A tender in which the rate is not specified in rupees or rupees and annas will be rejected as null and void.

11 The whole amount of each allotment will be divided into four equal instalments as follows, payable into the Bank of Bengal—

- Instalment I As near as possible to 25 % payable on 17th September 1898
- Instalment II As near as possible to 25 % payable on 3rd October 1898
- Instalment III As near as possible to 25 % payable on 31st October 1898
- Instalment IV As near as possible to 25 % payable on 30th November 1898

(including earnest deposit if in currency note or cheque)

N.B.—The words "as near as possible" are used in this paragraph for the purpose of making each instalment an exact multiple of Rs 100 for debentures in excess of Rs 500.

12 Parties whose tenders are accepted will have the option of paying all or any of the instalments before the dates specified above and will receive interest from the date of such payment.

13 Anticipation interest will be paid on all instalments from the respective dates on which such instalments are paid into the Bank of Bengal to the 30th November 1898.

14 In the case of two or more tenders at the same lowest rate accepted, a *pro rata* allotment will be made, but no such allotment will be issued if the amount thus allocable on any tender is less than Rs 500.

15 A minimum having been previously fixed, tenders will be opened by the Loan Committee of the Commissioners at 2 P.M. on Monday, the 29th August 1898, at the Municipal Office.

## The Indian Law Reports

Published under Authority

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1898 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the reports from 1870—

AUSTRALIA—ESPERANCE BAY

*Woody island—Rock north-east of island*

THE British Admiralty has given notice (No 395 of 1898) that information has been received through the Board of Trade that on January 29th, 1898, the S S *Time*, proceeding to Esperance bay from the eastward through the Recherche archipelago, when abreast of Woody island, struck on an unknown rock.

This rock (Time rock) has been placed on the Admiralty Charts as a rock with less than 6 feet on it, with Woody island summit bearing S W, distant  $1\frac{1}{2}$  miles, and Black island N W.

Approximate position, lat  $33^{\circ} 57' 5''$  S, long  $122^{\circ} 1' 50''$  E

CAUTION—This approach to Esperance bay is unsurveyed and should not be used, vessels should enter only through Causoway or Western channels

## BAY OF BENGAL AND ARABIAN SEA

*Alterations in storm signals at ports of India*

With reference to Notice to Mariners No. 108, dated the 30th April last, issued by this office, the British Admiralty has given further notice (No 361 of 1898) that information has been received from the Government of India that, on 1st April 1898, the undermentioned system of storm signals was adopted at all the ports of India with the exception of those in the river Hughli, and with that exception the previous systems have been discontinued —

*Day signals*

- 1 CAUTIONARY —BAY OF BENGAL.—The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed squally weather in the Bay of Bengal, which may be the first stage in the formation of a cyclonic storm, and which, if it develops, is likely to affect that part of the coast on which the port, where the signal is shown, is situated

ARABIAN SEA —The square flag *W* of the International Code, hoisted at the storm signal staff, indicates the existence of disturbed weather off the west coast of India near the port or ports where the signal is shown, or the advance of a cyclonic storm across Hindustan from the Bay of Bengal, which may shortly give squally or stormy weather in the Arabian sea

In either of the above cases if the disturbed conditions pass away without producing stormy weather, the cautionary signal is hauled down, but if the disturbed weather will probably develop into a cyclone, signals indicating the probable position, character, and track of the approaching storm, are shown as follows

- 2 WARNING SIGNAL —A *ball* indicates that a cyclonic storm has formed, which will probably reach the port where the signal is shown, but is still at a considerable distance from it

The same signal will also be shown at more important ports on the west coast of India to indicate that a storm has formed in the Arabian sea at some distance from the coast and will shortly cross one or other of the tracks of vessels leaving those ports, but will not reach such ports. The Port Officer will receive details to communicate to vessels leaving the port

- 3 DANGER SIGNALS —(a) A *cone*, apex downwards, indicates that a cyclonic storm, probably slight to moderate, is affecting the port, and that its centre will probably cross the coast considerably to the southward
- (b) A *cone*, apex upwards, indicates that the centre of such a storm as above (3 a) will probably cross the coast considerably to the northward
- (c) A *drum* indicates that the centre of such a storm as above (3 a) will probably cross the coast over or near the port.
- 4 GREAT DANGER SIGNALS.—(a) A *cone*, apex downwards, over a *ball*, indicates that a cyclonic storm of great intensity is affecting the port and that its centre will probably cross the coast considerably to the southward
- (b) A *cone*, apex upwards over a *ball*, indicates that the centre of such a storm as above (4 a) will probably cross the coast considerably to the northward
- (c) A *drum*, over a *ball*, indicates that the centre of such a storm as above (4 a) will probably cross the coast over or near the port.

*Night signals*

- 1 No cautionary signals are shown at night
- 2 A *red* light indicates similarly to warning signal (2) above
- 3 (a) A *red* light, placed vertically over a *white* light, indicates similarly to danger signal 3 a, above
- (b) A *white* light, placed vertically over a *red* light, indicates similarly to danger signal 3 b, above
- (c) Two *red* lights, placed vertically, indicate similarly to danger signal 3 c, above
4. (a) Two *red* lights, placed vertically over a *white* light, indicate similarly to great danger signal 4 a, above
- (b) A *white* light over two *red* lights, placed vertically, indicates similarly to great danger signal 4 b, above.
- (c) Three *red* lights, placed vertically, indicate similarly to great danger signal 4 c, above

## AUSTRALIA, EAST COAST—BRISBANE RIVER

*Alterations in lights and beacons*

THE British Admiralty has given notice (No 359 of 1898) that the undermentioned information, dated 2nd May 1898, relating to lights and beacons in Brisbane river, has been received from Lieutenant and Commander C W S Leggatt, H M S. *Goldfinch* —

- 1 A *fixed white* light is shown from West beacon, on the detached, dry bank at the western side of the entrance to the river.

Approximate position, lat  $27^{\circ} 21' 55''$  S, long  $153^{\circ} 10' 20''$  E

- 2 A *fixed white* light is shown from the white beacon situated S by W  $\frac{1}{2}$  W, distant  $3\frac{1}{2}$  cables, from the south-west angle of the Boatman's house enclosure, Lytton, and a *fixed red* light from the white beacon which in line with the first leads through Lytton reach in direction marked C on Chart

These beacons and lights would shortly be moved southward of their previous positions, and then in line would lead in the channel northward of Gibson island

- 3 Two beacons, the north-eastern (front) to show a *red* light and the south-western (rear) a *white* light, which in line would lead up Lytton reach, were in course of erection at the north-east end of Gibson island.

- 4 The lights (*red*, front, *white*, rear) previously shown from the beacons on the northern side of Lytton reach, opposite Gibson island, have been discontinued, and in lieu thereof two white beacons, the front one showing a *fixed red* light and the rear a *fixed white* light, have been erected on the south side of the river eastward of Queensport

These last beacons in line lead in the channel through Eagle farm flats

- 5 Also, that the western sides of Bulmba and Humbug reaches have recently shoaled considerably, for a distance of about 4 cables on each side from Humbug point, and a note to that effect has been placed on the Chart

*Reported rock above water*

THE British Admiralty has given notice (No 360 of 1898) that information has been received that the Master of the American Missionary steam-vessel *Morning Star* reports having passed, in lat  $7^{\circ} 32' N$ , long  $173^{\circ} 13' W$ , a ragged coral rock, about a quarter of a cable in extent, and 6 to 10 feet high

A rock, with the words "Bray rock, 6 to 10 feet high," written against it, has been placed on the Admiralty Chart in the above position

As islands had formerly been reported in this locality by whalers, viz, one in lat.  $7^{\circ} 48' N$ , long  $173^{\circ} 12' W$ , and "Four rocks" in lat  $7^{\circ} 51' N$ , long  $176^{\circ} 6' W$ , it is probable that a reef exists in the vicinity, of which the rock reported is a head above water

**WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT,  
I OF 1893, IN THE HOWRAH MUNICIPALITY DURING THE  
YEAR 1897-98**

No. 4949M.—The 13th August 1898.—The following report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-brigade Act, I of 1893

H. H. RISLEY,  
Secy. to the Govt. of Bengal

**ANNUAL REPORT FOR 1897-98 UNDER THE LICENSED WAREHOUSE  
AND FIRE-BRIGADE ACT, I OF 1893, AS AMENDED BY ACT I  
OF 1894**

Dated Howrah, the 15th June 1898

From—F. W. DUFF, Chairman of the Howrah Municipality,  
To—The Magistrate of Howrah

I HAVE the honour to report that 297 warehouses were licensed in 1897-98 of the 394 registered in this year, against 278 in 1896-97 of the 375 registered in that year, the details being as follows—

YEAR	Jute	Cotton	Straw	Wood	Rags	Hay.	Total	REMARKS.
1	2	3	4	5	6	7	8	9
<i>Registered</i>								
1896-97	30	37	91	213	1	3	375	Exemptions under Notification No 2853M, dated the 14th August 1893, account for the difference between the number of registered and licensed warehouses

<i>Licensed</i>								
1896-97	26	31	46	171	1	3	278	
1897-98	28	32	56	178		3	297	

2 The income from license fees during the year under report amounted to Rs 5,388 of which Rs 307 were collected on account of arrears for 1896-97, and Rs 380 represent the increment from 19 new licenses, of which 6 were issued to docks, sawmills and workshops, which, though long in existence, had hitherto escaped registration. In the year 1896-97 the collection amounted to Rs 4,239, of which Rs 26 accrued from arrears of 1895-96. There was thus a substantial increase of Rs 1,049 in the gross income of 1897-98 over the income of the previous year.

3 The demand, collection, remission, and balance for 1897-98 are shown in Appendix A, and the details of licenses granted in this year to jute and cotton warehouses are entered in Appendix B. Owing to the comparative unimportance of the 237 licenses granted for the storage of straw, wood, rags, and hay in 1897-98, against 221 in the preceding year, they have not been entered in Appendix B, and it may be noted that such licenses have only been levied under the Fire-brigade Act since July 1893, prior to which they were levied under section 261 of the Bengal Municipal Act.

4 There were 54 prosecutions which realised Rs 45 against 53 in the previous year, which realised Rs 313, but 28 of the prosecutions in the year under report were withdrawn on payment of fees and costs.

5 The expenditure incurred in assessing and collecting license fees amounted to Rs 871—

<b>Total</b>	<b>871</b>	<b>0</b>	<b>0</b>

6 The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire brigade Station in Howrah stands in a very central position, north of the Municipal Market, and from a wooden stage raised over it the whole town is overlooked. There were ten fires during the year, the details of which are given in Appendix C. Besides these, there were thirteen other petty fires, at nine of which the Fire-brigade attended, and four of which were extinguished by the residents of the localities.

7 The Commissioner of Police demanded Rs 3,446 for the maintenance of the Fire-brigade in 1897-98, and this amount was remitted to him during the year.

**RESOLUTION ON THE ANNUAL REPORT ON EMIGRATION FROM  
THE PORT OF CALCUTTA TO BRITISH AND FOREIGN  
COLONIES FOR THE YEAR 1897**

**GENERAL DEPARTMENT—EMIGRATION**

*Calcutta, the 16th August 1898*

**RESOLUTION—No 2596**

**READ—**

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1897

The appointment of Protector of Emigrants was held by Dr R Maclood from 1st January to 14th February 1897, when he retired from the service of Government Dr. W Forsyth held the appointment from 15th February to 15th May and Dr C Banks from 16th May to the end of the year. The duties of Medical Inspector were performed by Surgeon-Major A. W. D. Leahy throughout the year

2 The administrative measures introduced during the year were of minor importance only A short Act VII of 1897 was passed by the Imperial Council amending section 102 of the Indian Emigration Act, 1888. Authority was also given by the Government of India to the emigration of natives from the Ports of Calcutta, Bombay or Karachi, to labour for hire in British East Africa, on or in connection with the Uganda (Mombassa-Nyanza) Railway. An addition was made to Rule 178A of the rules under Act XXI of 1883 amplifying the test prescribed for lime-juice supplied for the use of Indian emigrants, and minor amendments and additions were made to Rules 6, 9, 11, and 19 under the same Act for the regulation of recruiters' licenses, sub-depôts, and registration of intending emigrants.

3 As in the previous year, there were six agencies at work—five British and one Dutch. The following table shows the demand and supply of labour to the different colonies, as compared with the preceding year 1896 —

NAME OF COLONY	1896		1897	
	Indent	Supply	Indent	Supply
1	2	3	4	5
Demerara	2,276	2,250	1,200	1,119
Trinidad	3,000	2,841	1,700	1,800
Mauritius	400	546	240	292
Natal	815	1,725	1,991	2,850
Fiji	1,166	1,128	1,300	1,287
Surinam	1,119	1,119	590	Supplied in January 1898
Total	8,776	9,609	7,024	7,378

Terms of engagement of intending emigrants

4. There was no alteration in the terms on which emigrants were engaged during the year

5 The number of licenses granted to recruiters was 539, of which 3 were cancelled on account of misconduct of the recruiters concerned. The emigrants registered during the period under review numbered 12,315 Of these 9 per cent were recruited in Bengal, 10 per cent. in Bihar, 56 per cent in the

Recruiting operations

North-Western Provinces, and 24 per cent. in Oudh, proportions which do not differ materially from those of the previous year

6 Of the emigrants accommodated in the sub-depôts, 2,677 never started for Calcutta, 2 died, 460 deserted, and 1,442 were rejected as unfit, showing a percentage of deductions of 21, as compared with 24 in 1896 Of the remainder, 153 remained in the sub-depôts at the close of the year and 239 were not accounted for In the end, 9,411 or 75 per cent of those recruited actually arrived in Calcutta, against a percentage of 71 in the previous year

The total number of emigrants accommodated in the Calcutta depôts, including re-admissions from outside hospitals and those who remained over from the previous year, amounted to 9,809. Of these, 742 were rejected as unfit, 26 died, 69 deserted, 116 were sent to outside hospitals, and 600 were discharged for various reasons. The total number despatched to the colonies was 7,589 or 77 per cent. of the coolies brought to Calcutta, leaving 667 in the depôts at the close of the year for subsequent disposal.

Of the number embarked, 7,151 were Hindus and 438 Musalmans, the majority being classified as agriculturists and low caste labourers.

The Lieutenant-Governor notices with pleasure that the arrangements made for the accommodation of emigrants in the depôts at Garden Reach and for their food, clothing, medical care, and sanitary surroundings are reported to be satisfactory, and to compare favourably with those of five years ago He himself was very favourably impressed at a recent visit to the Demerara Depôt so shortly after a period of famine in the regions of Upper India, from which the majority of the emigrants come, he expected to see broken-down peasants who had despaired of bettering their fortunes in their own country He was surprised to find that the emigrants were the pick of the agricultural population, stout, sturdy men and women, robust in health and bright in spirit The famine, indeed, as appears from the figures in paragraph 3, had no effect in increasing emigration to the colonies, and the Resolution recently published showed that its influence on inland emigration was much smaller than might have been expected

In the Resolution on the report of last year, reference was made to the proposal that the rates of compensation awarded to persons rejected in Calcutta as unfit for despatch should be raised, and the opinion was expressed that the frequent award of compensation was much more needed than a further enhancement of the rates. The reduction in the percentage of rejections is satisfactory so far as it goes, but the Protector has not said what has been done towards giving effect to the wishes of Government in the matter of awarding compensation to persons who are brought down to Calcutta, at great inconvenience to them, and then rejected as unfit. Special attention is desired to this matter in the current year.

Sanitation and management of depôts

7 The total number admitted into hospitals amounted to 489, of whom 26 died

8. Of the 7,589 emigrants embarked, 15 per cent were conveyed to Demerara (British Guiana), 24 per cent. to Trinidad, 4 per cent. to Mauritius, 38 per cent. to Natal, and 17 per cent to Fiji. Seven sailing vessels and 9 steamers were employed to convey the emigrants, against 13 and 6 respectively in the previous year, the average number carried on each being 474 against 535 in 1896. The steamers were bound for Mauritius and Natal only; but the increased employment of steamers resulted in the reduction of the average duration of the voyage to 52 days against 68 days in the previous year, and of the average number of days each statute adult emigrant was at sea from 73 days to 61 days. The benefit of this marked shortening of the voyage was shown in the fall of the aggregate mortality on the 16 voyages to 58, from 129 during the 19 voyages of 1896 The mortality in 1897 was largely due to measles on the sailing vessels *Illione*, *Clyde*, *Jura*, and *Ems*.

9. Returned emigrants numbered 3,750, against 3,297 in 1896. Ninety-five deaths occurred on the return voyage, the highest mortality being on the ships *Clyde*, *Mersey*, and *Avon*, upon which 25, 21, and 19 deaths took place respectively Chronic

Returned emigrants

Embarkation of emigrants.

disease and chest affections were prevalent, and on the *Mersey* there was an epidemic of measles

The highest number of emigrants—2,608—returned from Demerara, while 1 only returned from the French colonies. The aggregate ascertained savings amounted to Rs. 4,51,863 6-3, the average per head being Rs 120 against Rs 5,74,882 9-3, or an average of Rs. 174 per head in the previous year. As in the previous year, the largest average savings per head, Rs 212, were those of the returned emigrants from Trinidad. The smallest, averaging Rs 23, were those of the emigrants returning from Mauritius. Demerara, which contributed two-thirds of the returning emigrants, sent each one off with savings aggregating Rs 108

10 This Government is not in possession of information absolutely up to date showing the numbers and condition of Indian emigrants resident in the different colonies, but the particulars extracted below as regards the principal colonies in which there is any considerable Indian population, are taken from the sources of information, available—principally from the reports received from the different colonies—

COLONY.	Average Indian population	Average yearly number of emigrants arriving from India	Average yearly number of emigrants returning to India	Average savings of returned emigrants.
1	2	3	4	5
Demerara	111,000	5,274	2,014	£ 10 18
Trinidad	78,000	2,556	760	13 8
Mauritius	113,000	4,213	1,278	2 3†
Natal	45,000	2,727	486	14 10
Fiji	10,000	1,704	676	10 7
Jamaica	14,000	330	145	7 9
Surinam	11,000	} Not available		
Reunion*	21,000			

\* Emigration to this colony was suspended in 1882  
† Converted from rupees at 1s 4d.

The figures are calculated on the average of the five years ending 31st December 1896, and are complete for the several colonies, covering emigrants from all parts of India.

Setting aside Jamaica, the number of emigrants to and from which in recent years has been inconsiderable, and Mauritius, the circumstances of which would appear to be singularly unfavourable, the average savings brought away by returning emigrants do not differ largely in amount. The subject is one of interest and importance, but sufficient information is not available for positive conclusions to be drawn. The Protector should therefore collect information as to the numbers of the resident Indian population in the different colonies, and the numbers of yearly immigrants and their savings, and should discuss in future reports the relative advantages offered by the different colonies as shown by the position and prospects of the resident emigrants, and the savings of those who return, so far as they can be ascertained.

11. The aggregate number of estates under administration was 674, valued at Rs. 73,186-9-5. Of these, 248 estates, valued at Rs 29,764-9-1, were finally disposed of, the sum of Rs. 27,879-7-10 having been paid to the heirs in respect of 196 estates, and the sum of Rs 1,885-1-3 standing at the credit of the remaining 52 estates having lapsed to the Indian and Colonial Governments concerned, owing in some cases

to absence of heirs, and in others to inability to trace them under the incorrect descriptive particulars furnished by the emigrants at the time of registration. Besides the final disposal of the 248 estates, heirs were traced in respect of 133 estates, valued at Rs 20,860-14-9, and the sums due were in course of payment. The net result shows that the enquiries for heirs were completed in respect of 381 estates or 58 per cent. of the total number of estates under administration during 1897, against a percentage of 54 in 1896. The remaining 273 estates, valued at Rs 22,561-1-7, were still under enquiry, being a percentage of 41 of the total number of estates under administration against 45 in 1896. Enquiries were as a rule made within reasonable periods, and the Protector acknowledges the assistance of District Officers in this connection.

12. The financial results of the Colonial emigration operations, show a reduction in the receipts derived from the consolidated fee of Rs. 3 per head on each emigrant embarked, of Rs 6,573-4-2, and in the charges, of Rs 1,462, the year closing with a deficit of Rs 3,883-0-9 against a surplus of Rs. 1,228-3-5 at the end of 1896. The Protector observes that the deficit was due to the fact that 2,587 fewer emigrants were despatched to the colonies than in 1896.

13 Dr Banks has recorded his satisfaction with the manner in which work is carried on, by the Emigration Agents, and to Dr. Banks himself the thanks of Government are due for the efficient manner in which he performed his duties as Protector of Emigrants during the year.

By order of the Lieutenant-Governor of Bengal,

M FINUCANE,

*Secretary to the Govt. of Bengal.*

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beekley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

## SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1898

At the end of June weather conditions were practically normal both as regards pressure and temperature. In the 1st of July, however, pressure began to fall, and there were signs of the beginning of a small disturbance in the north of the Bay. On the 2nd a further fall took place in pressure, and a well marked though shallow depression appeared over the Sandheads. Though pressure continued to fall on the succeeding day, the depression became diffused, winds veering round to their normal direction in the north-west angle of the Bay. On the 4th a recovery took place which continued still more markedly on the 5th, but fair and general rain had accompanied the development of the small depression.

Temperature which had been nearly normal at the commencement oscillated slightly during the first six days of the month, never differing greatly from the normal.

Up to this date a fairly strong monsoon had been blowing in the Bay, and the general distribution had remained nearly constant. From the 6th, however, a marked diminution took place in the strength of the monsoon, while pressure, which had for some days been deficient, rose and remained fairly normal over the province for a considerable period. Signs of a local disturbance were not wanting at the head of the Bay, but the weakness of the monsoon afforded but little opportunity for its development. With the comparatively fine weather which characterised this period, temperature naturally rose and remained above the normal till the 15th of the month. Till the same date the monsoon current continued weak, but after that a gradual revival of strength took place, and weather again became of the ordinary monsoon character. Up to the 16th pressure underwent small oscillations, but never deviated much from the normal. The general features of the distribution were likewise remarkably constant, the area of low pressure remaining steadily over the west or north-west of the province, and giving rise to the usual winds of the season. Fair and general rainfall took place during this time, and the temperature fell from the high point which it had reached and remained practically steady and near the normal.

On the 16th there was a sharp fall of pressure over the province, which was followed by a slight recovery in Bengal on the succeeding day, but which continued, though in a considerably lesser degree, in Bihar, Chota Nagpur and Orissa. On the 18th the barometer began to rise very rapidly in Bihar as well, and in consequence a shallow depression was formed over the south-west of Bengal and the adjacent sea. Heavy rain and a considerable fall of temperature accompanied the violent oscillation of pressure.

The depression which was due merely to the rapid advance of the wave of fall and recovery over the province quickly disappeared, and the barometer on the 19th stood comparatively high.

On the 20th weather again began to be unsettled off the Orissa and Coromandel Coasts, a small shallow though well marked depression appearing to the south-east of Gopalpur. On the 20th the barometer which stood comparatively high fell slightly, but the area of low pressure became much more diffused and spread over a considerable part of the adjacent land area. The centre appeared to be in the neighbourhood of Puri, and winds along the coast were very light and variable, changing from north-west in the morning to south on the night of the 21st. In the early hours of the 22nd, however, the disturbed conditions prevailing in that quarter led to the formation of a fresh depression of considerably greater intensity, the centre apparently lying to the east of Puri. In the course of the day the storm following a most unusual course for this period of the year moved slowly along the coast, and on the 23rd its centre was about 40 miles to the south-east of Gopalpur. During the 23rd the storm continued to move in the same general direction, having in the meantime gained considerably in depth, and on the morning of the 24th its centre was immediately over Vizagapatam. Here it we except a slight further motion of its centre some twenty miles to the south, it practically maintained its position unchanged, and its intensity undiminished during the 24th and 25th July, and it was only in the early hours of the 26th that it finally crossed the coast in the neighbourhood of Vizagapatam. Its subsequent course was as unusual as its initial path, as it proceeded in a north-westerly direction, and finally broke up in the Central Provinces.

A further unusual feature of this storm, which should be noticed, was the prevalence of strong winds in the north-east quadrant and the comparative lightness of the winds to the south-west.

The effect of this disturbance on the weather in Bengal was distinctly unfavourable as far as rain was concerned owing to the strong indraught of winds from the north. Till the 26th, when conditions began to be more normal, practically no rain fell over the province, and a consequent rise in temperature took place everywhere. On the 27th, the area of low pressure again shifted to the north-west, and general and abundant rainfall took place.

Pressure, which had risen considerably above the normal during the progress of the storm, now fell steadily till the 30th. On the 31st there was a slight recovery, but insufficient to raise the pressure above the normal, so that, except in Burma, readings on the last day of the month were everywhere in defect.

Rain fell continued to be general till the end of the month.

Temperature, which had fallen below normal on the 27th, oscillated slightly in the last days of the month, but the general tendency was downwards, so that on the 31st readings were low at all stations.

*Summary*—Weather was, on the whole, of ordinary monsoon character. Two small breaks in the rainy weather were noticeable: the first, which occurred from the 6th to about the 13th, being due to a weakening of the monsoon current, while the second from the 19th to the 26th was, owing to the storm, off the Coromandel Coast, which, by diverting the current and causing heavy rainfall in that quarter, deprived the province of its usual rain.

*Pressure* fell in the beginning of the month after the 6th it recovered, and rising slowly till it reached the normal, oscillated very slightly about that position till the 16th. From the 16th to 18th a rapid fall, followed by an equally rapid rise, took place, which left the pressure in slight excess. During the storm in the latter part of the month, it rose with slight oscillations still further, but owing to the fall which took place in the last few days the month ended with a slight defect in pressure throughout the province.

The resultant effect of these changes was that the average pressure for the month has been everywhere below the normal, the defect being generally slight, but greatest in Bihar and Orissa.

*Temperature* was also subject to considerable variations, the rise and fall being generally coincident with the periods of smaller or larger rainfall. It will be found accordingly that from the 6th to the 13th temperature, which up to the former date had been nearly normal, rose slowly and was for some days in excess. From the 13th it fell to a point below normal, and during the second break again rose. During the last days of the month, however, a fresh fall took place, which resulted in readings being low at all stations on the 31st of July. Taking the average for the month, it is found to be slightly above the normal over the greater part of the province, the only divisions where there was a small defect having been South-West Bengal and Orissa.

*Rainfall*—Rainfall was fairly general during the month, except during the two periods mentioned above, when adverse conditions prevailed. These two periods of deficient rainfall were, however, of sufficient length to affect the totals prejudicially, and the totals are consequently below the normal in all divisions. The defect is, however, in no case very large, being greatest in North Bengal, where it amounts to 20 per cent, and least in Chota Nagpur, where it is only 2 per cent.

Reckoning the rainfall from the 16th May, the amount is practically normal for Bengal and Chota Nagpur, and in slight defect for the other two divisions.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls of the past seven months of the year in each division expressed as a percentage of the normal fall—

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage, and the fourth column gives the same information in

a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall —

*No 5182Medl*—*The 19th August 1898*—For Appendix I to Plague Regulation No 14, dated the 7th June 1898, containing instructions for the method of disinfection, substitute the following —

#### APPENDIX I.

Under clothing, bedding, wearing apparel, mattresses, carpets, &c, which are contaminated or suspected, and other articles to be disinfected should be exposed for fifteen minutes to saturated steam—under pressure, if possible—at a temperature of not less than 100° C (212° F), care being taken that the steam shall reach all parts of each article to be disinfected

Disinfecting solutions—

(a) Solution of corrosive sublimate, of 1 part in 1,000, with the addition of 10 parts of chloride of soda

The solution should be coloured with aniline dyes or indigo. It should not be placed in metal vessels

(b) A 5 per cent solution of pure crystallized carbolic acid, or 5 per cent of crude commercial carbolic acid free from tar oils in a warm solution of soft soap

The carbolic solutions will be useful, more particularly for disinfecting articles, such as metals, instruments, etc, which can neither be subjected to a temperature of 100° centigrade, nor placed in contact with corrosive sublimate. They may also be used at ports not provided with a disinfecting stove of the prescribed pattern

7 Water will be supplied under rule 6—I, II and III from 25th June to 25th October only, and under rule 6—IV from 25th October to 31st March.

8. The water-rates will become due, and payment must be made on the dates mentioned below —

Leases under rule 6—I and II .. .. .	The 31st of January
Leases under rule 6—III and IV .. .. .	When the lease is executed
Charges under rule 6—V .. .. .	When the order authorising the assessment is passed.

9 The areas to be charged will, as far as practicable, be determined before the lease is executed, but lands irrigated beyond the boundaries of the lease or in excess of the area entered in the lease will be measured and charged at the rates mentioned in the lease. The application must be for such an area as will probably be irrigated with existing appliances, and no lease will be accepted when the block applied for is not a suitable one and when unleased lands will necessarily or probably be irrigated by water supplied for the land included in the leased block. In the case of long leases the measurements taken in the year in which the lease is executed will ordinarily be accepted for the remainder of the term, but in special cases the Divisional Canal Officer may, by a written order, authorize a remeasurement.

10 The Divisional Canal Officer may, under special circumstances for the convenience of the canal administration, sanction a long lease for a term of three instead of seven years.

11 In the case of long and season leases, the minimum area chargeable will be that specified in the lease independently of water being or not being required and utilized.

12 Leases under rule 6—I, II and III will only be entered into with (a) the zamindar or subordinate proprietor of the village, and (b) with a body of cultivators not exceeding six in number, who will agree to represent the cultivators, and who will be jointly and severally responsible for the payment of the water-rates due under the lease. Leases under rule 6—IV will be entered into with representatives of the actual cultivators.

The persons who sign the lease under rule 6—I, II, III and IV will be entitled to a deduction of 12½ per cent on all payments made within one month of the water-rates becoming due. If the lessee is not the zamindar or talukdar, a moiety of the amount due for the first year will in the case of long and season kharif leases be payable in advance.

13 When it comes to the knowledge of the Subdivisional Canal Officer that canal water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Divisional Officer, who shall, if he is of opinion that the fields can be legally assessed, fix the rate at which the assessment is to be made and return the record with his orders passed thereon to the Subdivisional Canal Officer. No assessment under section 79 of Act III (B C) of 1876 is to be made without the written orders of the Divisional Canal Officer, and no rates shall be imposed for unauthorized irrigation on lands irrigated without permits beyond the area shown as commanded on the map filed in the Collector's Office under Rule 1.

14 Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st of June next following.

The Superintending Canal Officer may also direct the Divisional Canal Officer to cancel any lease if, after the lapse of one month from the latest date of payment, the water-rates (except such as are irrecoverable under Rule 17) are in arrears.

15 Remission of water-rates, either in whole or in part, as the case may require, shall be granted by the Divisional Canal Officer for—

I —Errors in the assessment of rates.

II —Injury to the crop on a leased area caused by deficient supply of water, provided that a written application for remission has been made 15 days at least before the crop is out.

16 Remissions on other grounds than the above require the sanction of Government.

17 In cases where sums due on account of water rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Superintending Canal Officer.

18 No cross dams other than those the erection of which has been sanctioned as a permanent arrangement will be allowed without the written order of the the Divisional Canal Officer. Every cross-dam must be provided with a suitable and efficient escape, so that the flow of the water in the channel may not be interfered with.

19 The Canal Officer will not interfere with the fishery rights hitherto exercised by the proprietors of the river beds, but no stakes shall be allowed to be fixed for the purpose, excepting on and from the 1st of February to the 31st of March, and then only in such a way as not to interfere with the flow of the water.

20 Tanks may be filled with canal water without charge, wherever water can be made available without injury to the cultivation dependent on a canal under the following conditions —

I —No tank shall be filled unless the water is to be exclusively used for domestic purposes or for watering cattle.

II —No tank shall be filled from which irrigation is practised.

III—No tank shall be filled which intercepts any line of drainage or is liable to overflow from the accumulation of water from natural causes

IV—No tank shall be filled except on the written order of the Subdivisional Canal Officer issued on the written application of the persons concerned

V—No tank shall be filled unless the village channel used to convey water to it shall be shown to the satisfaction of the Subdivisional Canal Officer to be in a sound condition when the application is made

VI—The privilege here accorded may, by the written order of the Subdivisional Canal Officer, be suspended for twelve months for the breach of any of the above rules

21 When tanks which are used both for irrigation and domestic purposes are filled with canal water, a charge of Rs. 25 will be made for each small village and of Rs 50 for each large village in which the tanks are filled.

22 The Divisional Canal Officer may supply water for manufacturing or other purposes, and charge for the same at the rate of one rupee for each 10,000 cubic feet or part of 10,000 cubic feet supplied. The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner.

23 No person shall, without the permission in writing of the Divisional or Subdivisional Canal Officer, pass or cause any animal or vehicle to pass on or across any of the works, banks or channels of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords and ferries and their approaches as are provided by the Divisional Canal Officer

24 No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another or jointly, or in shares with others

25 Except as provided in the Act and in these rules, no appeal shall lie from any order passed by a Canal Officer, but the Subdivisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Subdivisional Canal Officer or Divisional Canal Officer shall modify any orders passed by them in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

- Age of the Candidate.

*From School-masters*

- A certificate from the Secretary or Proprietor of the school in which the candidate is serving to the effect that he has been a *bond fide* paid teacher of the school in which he teaches, and has been so ever since the 1st June 1898. In case of a school-master who has served in *more than one school*, he must produce certificates from the several schools in proof of his having been a *bond fide paid* teacher all along since the 1st June 1898.

Failing to produce the above certificate or certificates, a school-master will be subject to the rules applicable to *bond fide* private candidates, as given above.

4. If this office is satisfied that all is in order, the Inspector will countersign and return the application, and this then will be the candidate's passport for admission to the test-examination.

5. The Head Master of an institution (one of those named above) should direct private students to appear before him not later than the 2nd January with their applications for admission to the Entrance Examination, and in the case of those candidates who have satisfied the test, he will cause them to sign their application forms in his presence, and will grant the necessary certificates, and then forward the applications to this office for countersignature, after which they will be sent by the Inspector *direct* to the candidates.

6. Expedition is necessary in carrying out all these instructions, and candidates should be *most careful* to give their names and addresses written legibly and distinctly, so that no mistake may be likely to occur.

7. Under no circumstances should the entrance fee be sent to this office.

8. Private students will understand that the test-examination of any schools other than those named above will not be accepted by this office.

9. Addresses of private students should be supplied to this office.

ABINASH CHANDRA CHATTERJEE,

*Inspector of Schools, Burdwan Circle.*

## OFFICE MEMO.

## RULES FOR APPEARING AT THE F A AND B A EXAMINATIONS FOR CANDIDATES FROM THE BURDWAN CIRCLE, WHO ARE NOT STUDENTS OF ANY AFFILIATED INSTITUTION

DEPUTY INSPECTORS of Schools, Sub-Inspectors of Schools, and *bonâ fide* masters of English schools, who have served as such for the full period of two academical years, or of six months after the examination of the same class last held by the University in the case of those only who were admitted to a former examination of that class, will be admitted to the abovementioned examinations. The applications of school-masters should be accompanied by a certificate of length of service from the Secretaries or Managers of the schools in which they are employed, and should reach this office not later than the 7th January 1899. The application of a school-master for permission to appear at the F A or B. A examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed. The application should be forwarded to this office for countersignature, together with the Registrar's certificate to prove, if this be the case, that the candidate has appeared at the examination in a previous year, and the certificate in proof of his having passed the Entrance or F. A. examination as the case may be, and it will be sent back to him (the candidate) who will have to send it, together with the examination fee, to the Registrar of the University *direct*. School-masters are not required to pay any fee for getting their application for permission to appear at either of the abovementioned examinations countersigned by this office.

2 Candidates should read carefully the form of the certificate which this office is required to sign, and should be careful to supply all information and documents required, including the Registrar's receipt in the case of those school-masters who have been admitted to a former examination of the same class, without which the Inspector must decline to sign the certificate.

3 By *bonâ fide* masters of schools are to be understood masters who hold regularly paid appointments in English schools, teaching at least the M E. course.

ABINASH CHANDRA CHATTERJEE,

HOOGHLY,

*Inspector of Schools, Burdwan Circle.*

### NOTIFICATION.

*Simla, the 19th August 1898*

*No 1200-E-B*—The following Regulations, which have been recently revised by Command of Her Majesty the Queen, Empress of India, are published for general information —

#### REGULATIONS RESPECTING FOREIGN ORDERS

1 No subject of Her Majesty shall accept a Foreign Order from the Sovereign of any foreign country, or wear the Insignia thereof, without having previously obtained Her Majesty's permission to that effect, signified by a Warrant under Her Royal Sign-Manual

2 Unless the Foreign Decoration shall have been conferred in consequence of active and distinguished Service, either at Sea or in the Field, such permission will not be given to any subject of Her Majesty, except in the following cases, if recommended specially by the Secretary of State for Foreign Affairs —

- (1) The Chief of a Complimentary Mission from Her Majesty.
- (2) A Military or Naval Attaché on the termination of his appointment
- (3) Any person, not at the time in the service of Her Majesty, who has rendered valuable service to the Sovereign bestowing the Order outside Her Majesty's dominions, or in an Embassy or Legation of that Sovereign in this country

3 The intention of a Foreign Sovereign to confer upon a British Subject the Insignia of an Order must be notified to Her Majesty's Principal Secretary of State for Foreign Affairs, either through the British Minister accredited to the Court of such Foreign Sovereign, or through His Minister accredited at the Court of Her Majesty

4 If the service for which it is proposed to confer the Order has been performed during War, the Notification required by the preceding Clause must be made not later than two years after the exchange of the Ratifications of a Treaty of Peace

If the service has been performed in time of Peace, the Notification must be made within two years after the date of such service

5 After such Notification shall have been received, Her Majesty's Principal Secretary of State for Foreign Affairs shall, if the case comes within the conditions prescribed by the present Regulations, and arises from Naval or Military Services before the Enemy, refer it to Her Majesty's Principal Secretary of State for the War Department, previously to taking Her Majesty's pleasure thereupon, in order to ascertain whether there be any objection to Her Majesty's permission being granted

A similar reference shall also be made to the Commander-in-Chief if the application relates to an Officer in the Army, or to the Lords of the Admiralty if it relates to an Officer in the Navy.

6 When Her Majesty's Principal Secretary of State for Foreign Affairs shall have taken the Queen's pleasure on any such application, and shall have obtained Her Majesty's permission for the person in whose favour it has been made to accept the Foreign Order, and wear the Insignia thereof, he shall signify the same to Her Majesty's Principal Secretary of State for the Home Department, in order that he may cause the Warrant required by Clause 1 to be prepared for the Royal Sign-Manual

When such Warrant shall have been signed by the Queen, a Notification thereof shall be inserted in the "Gazette," stating the service for which the Foreign Order has been conferred

7 The Warrant signifying Her Majesty's permission may, at the request and at the expense of the person who has obtained it, be registered in the College of Arms

8 Every such Warrant as aforesaid shall contain a Clause providing that Her Majesty's license and permission does not authorise the assumption of any style, appellation, rank, precedence, or privilege appertaining to a Knight Bachelor of Her Majesty's Realms.

9 When a British subject has received the Royal permission to accept a Foreign Order, he will at any future time be allowed to accept the Decoration of a Higher Class of the same Order, to which he may have become eligible by increase of rank in the Foreign Service, or in the Service of his own country, or any other distinctive mark of honour strictly consequent upon the acceptance of the original Order, and common to every person upon whom such Order is conferred

10 The preceding Clause shall not be taken to apply to Decorations of the Guelphic Order, which were bestowed on British subjects by Her Majesty's predecessors, King George IV and King William IV, on whose heads the Crowns of Great Britain and of Hanover were united

Decorations so bestowed cannot properly be considered as rewards granted by a Foreign Sovereign for services rendered according to the purport of Clause 2 of these Regulations. They must be rather considered as personal favours bestowed on British subjects by British Sovereigns, and as having no reference to services rendered to the Foreign Crown of Hanover.

FOREIGN OFFICE,  
23rd June 1898.

#### REGULATIONS RESPECTING FOREIGN MEDALS

1. Applications for permission to accept and wear Medals which, not being the Decoration of any Foreign Order, are conferred by a Foreign Sovereign on British subjects in the Army or Navy, should be addressed to the Commander-in-Chief or the Lords of the Admiralty, as the case may be, who, if they see fit, may submit the same for Her Majesty's sanction, upon obtaining which they may grant such permission without other formality.

2. Any other British subject, having obtained Her Majesty's permission, is at liberty to accept and wear a Foreign Medal, not being the Decoration of a Foreign Order.

3. No permission is necessary for accepting a Foreign Medal, if such Medal is not to be worn.

## POLICE SUPPLY AND CLOTHING DEPARTMENT

## NOTICE

SEALED tenders will be received by the Deputy Inspector-General of Police for Supply and Clothing, Burma, Rangoon, for the supplies entered in the subjoined schedules up to 12 o'clock noon on the 17th October 1898, when the tenders will be opened in the presence of those interested who may choose to attend.

Tenderers must tender for all the supplies entered in each schedule, but may tender for any one, or more or all of the schedules.

Tender forms and particulars regarding the contract and the contract deeds can be obtained on application to the Deputy Inspector General of Police for Supply and Clothing, Burma, Rangoon. Tenders should be enclosed in sealed envelopes, and the superscription "Tender for the supply of stores for the Burma Civil and Military Police" should be clearly written on the outside of the envelope. Successful tenderers will be required to establish an agency in Rangoon, and to keep stock throughout the term of the contract.

The Deputy Inspector General of Police for Supply and Clothing, Burma, does not bind himself to accept the lowest or any tender, and reserves to himself the right of rejecting any tender without assigning any reason for so doing.

### Corporation of Calcutta, LOAN NOTIFICATION.

THE Commissioners of Calcutta are prepared, with the sanction of the Governor-General in Council given under Section 404 of Act II (B.C.) of 1883, to open a Debenture Loan for Rs 30,00,000 (thirty lakhs) on the security of the rates, taxes and dues imposed and levied under the Calcutta Municipal Consolidation Act, 1888

2 The debentures will have a currency of (19) nineteen years from the 1st December 1898, and will bear interest at the rate of 4½ per cent per annum, payable on the 1st June and the 1st December of each year.

3. The form of the debentures will be that given in the twelfth Schedule of Act II (B.C.) of 1888.

4. No debentures will be issued for any sum less than Rs 500, and above that amount debentures will be issued only for multiples of Rs. 100.

5. Tenders for the whole or any part of the above loan of Rs. 30,00,000 will be received by the Secretary to the Corporation up to 2 o'clock p.m. on Monday, the 29th August 1898

6. Each tender must be made out in the form annexed to this Notification, and enclosed in a sealed cover, addressed to the Secretary to the Corporation, and superscribed—"Tender for Municipal Loan of 1898-99."

7 Each tender must be accompanied by an earnest deposit in Government promissory notes, Calcutta Municipal debentures, currency notes or cheques for not less than 3 per cent. of the amount tendered

8 When a tender is accepted, the earnest deposit, when made in currency notes or cheques, will be held as a payment in part of the amount tendered, and will bear interest at the rate of 4½ per cent per annum from the date of acceptance of the tender, provided that the whole amount tendered is paid up in the manner hereinafter prescribed, but no debenture will issue for the amount of the earnest deposit so long as the entire amount of the tender is not paid, but debentures may be issued for each instalment paid in full, the earnest deposit not being included in any but the last instalment

9 The earnest deposits on tenders, which may not be accepted, will be returned on application, and no interest will be payable on such deposits. If an allotment after being made is not taken up, or the full amount allotted is not paid as hereinafter prescribed, the earnest deposit will be forfeited.

10 The rate at which a tender is made must be specified in rupees, or rupees and annas, but not in any fraction of an anna. If a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna. A tender in which the rate is not specified in rupees or rupees and annas will be rejected as null and void.

11 The whole amount of each allotment will be divided into four equal instalments as follows, payable into the Bank of Bengal—

Instalment I As near as possible to 25 % payable on 17th September 1898

Instalment II As near as possible to 25 % payable on 3rd October 1898

Instalment III As near as possible to 25 % payable on 31st October 1898

Instalment IV As near as possible to 25 % payable on 30th November 1898

(including earnest deposit if in currency note or cheque)

N.B.—The words "as near as possible" are used in this paragraph for the purpose of making each instalment an exact multiple of Rs 100 for debentures in excess of Rs 500

12. Parties whose tenders are accepted will have the option of paying all or any of the instalments before the dates specified above and will receive interest from the date of such payment.

13 Anticipation interest will be paid on all instalments from the respective dates on which such instalments are paid into the Bank of Bengal to the 30th November 1898

14. In the case of two or more tenders at the same lowest rate accepted, a *pro rata* allotment will be made, but no such allotment will be issued if the amount thus allotable on any tender is less than Rs 500

15. A minimum having been previously fixed, tenders will be opened by the Loan Committee of the Commissioners at 2.30 P.M. on Monday, the 29th August 1898, at the Municipal Office

W. R. MACDONALD,  
Secretary to the Corporation.

Acts of the Governor General's Council assented to by the Governor General.

### GOVERNMENT OF INDIA LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 12th August, 1898, and is hereby promulgated for general information

#### ACT NO IX OF 1898

##### *An Act to make better provision for the regulation of the importation of live-stock*

WHEREAS it is expedient to make better provision for the regulation of the importation of live-stock which is liable to be affected by infectious or contagious disorders, It is hereby enacted as follows

1 (1) This Act may be called the Live-stock Importation Act,  
Short title local extent and commence ment 1898

(2) It extends to the whole of British India, and

(3) It shall come into force at once

2 In this Act, unless there is anything repugnant in the subject or context,—  
Definitions

(a) the expression "infectious or contagious disorders" includes tick-pest, anthrax, glanders, farcy, scabies and any other disease or disorder which may be specified by the Governor General in Council by notification in the Gazette of India, and

(b) "live-stock" includes horses, kine, camels, sheep and any other animal which may be specified by the Governor General in Council by notification in the Gazette of India

3 (1) The Governor General in Council may, by notification in the Gazette of India, regulate, restrict or prohibit, in such manner and to such extent as he may think fit

the bringing or taking, by sea or land, into British India or any specified place therein, of any live stock which may be liable to be affected by infectious or contagious disorders and of any fodder, dung stable-litter, clothing, harness or fittings appertaining to live stock or that may have been in contact therewith

(2) A notification under sub-section (1) shall operate as if it had been issued under section 19 of the Sea Customs Act, 1878, and the officers of customs at every port shall have the same powers in respect of any live stock or thing, with regard to the importation of which such a notification has been issued and the vessel containing the same, as they have for the time being in respect of any article the importation of which is regulated, restricted or prohibited by the law relating to sea customs and the vessel containing the same, and the enactments for the time being in force relating to sea customs or any such article or vessel shall apply accordingly

4 (1) The Local Government may, subject to the control of the Governor General in Council, make rules for the detention, inspection, disinfection or destruction of imported live-stock, and of fodder, dung, stable-litter, clothing, harness or fittings appertaining to imported live-stock or that may have been in contact therewith, and for regulating the powers and duties of the officers whom it may appoint in this behalf

(2) In making any rule under this section the Local Government may direct that a breach thereof shall be punishable with fine which may extend to one thousand rupees

5 No suit, prosecution or other legal proceeding shall lie against any person for anything in good faith done or intended to be done under this Act

Protection to persons acting under Act

### Present

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble M. C. TURNER.

The Hon'ble NORENDRA NATH SEN.

The Hon'ble SALGRAM SINGH.

The Hon'ble KALI CHARAN BANERJEE.

The Hon'ble JATRA MOHAN SEN.

The Hon'ble T. W. SPINK.

The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur.

## PREVENTION OF ACCIDENTS FROM RIFLE PRACTICE AT DUM-DUM.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the attention of the Government been drawn to a paragraph in the *Hindustan* of the 8th instant to the effect that the people of Kudihati, a village in the vicinity of the Dum-Dum Cantonment, have been put to serious loss and inconvenience by reason of the rifle practice of the local soldiers, and that one Bhutnath Bagdi was shot through the leg and the children of Babu Boikanta Nath Chackravati, a local medical practitioner, narrowly escaped being shot? If the above statements are substantially correct, will the Government be pleased to take the necessary steps with a view to the prevention of such accidents?

The Hon'ble MR. BOLTON replied —

“It has been ascertained that the statements referred to by the Hon'ble Member are substantially correct. A proposal for the re-alignment of the range so as to guard against all possibility of danger to the villagers is already under the consideration of the Military Department, and the necessity for completing the work by an early date will be brought to the notice of that Department.”

## RELIEF OF LOCAL BODIES FROM EXPENSES OF PLAGUE CAMPS

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Is it the case that a letter has been addressed by the Government to the Accountant-General by which it is proposed to recover from the local bodies the sum of Rs. 48,392 incurred in increasing the Police force at the Mauwa and Chausa Plague Camps? If so, having regard to the financial condition of most local bodies and the difficulty which they experience in meeting their own legitimate charges and the fact that the expenditure is to be incurred in connection with the plague, which is an imperial rather than a local question, will the Government be pleased to consider the propriety of relieving the local funds of this charge?

The Hon'ble MR. RISLEY replied —

“The order referred to has been issued under section 2, sub-section (1) of the Epidemic Diseases Act, which empowers the Government to determine in what manner and by whom any expenses incurred in preventing the spread of plague shall be defrayed. Such expenses are not merely a legitimate but a just charge upon the funds of local bodies, so long as they are able to bear them.”

## DURATION AND COST OF SETTLEMENT OPERATIONS IN ORISSA.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state how long the survey and settlement operations in Orissa have been going on, and when they are likely to come to an end, and also what they have already cost, and are likely to cost hereafter?

The Hon'ble MR. FINUCANE replied —

“The Survey and Settlement proceedings were commenced in Orissa in the month of November, 1889, and will probably be completed within the calendar year 1899. The cost up to the end of July, 1898, has been approximately Rs 30,50,000, and the further cost to be incurred before the proceedings are completed will probably amount to Rs 4,50,000.”

## APPREHENDED SCARCITY OWING TO DEFICIENT RAINFALL

The Hon'ble BABU NORENDRA NATH SEN said—

In view of the apprehended scarcity in several districts in these Provinces on account of deficient rainfall and disease among cattle, will the Government be pleased to give a definite idea of the agricultural outlook generally, and of the rice crop in particular?

The Hon'ble MR. FINUCANE replied —

"The telegraphic weekly weather and crop reports received from all districts which are published in the Calcutta Gazette, give the information asked for. In the reports for the week ending August, 8th, published in the Calcutta Gazette of the 10th, it was stated that more rain was then required for the transplanting of the winter rice in some districts, and especially in parts of Bankura, Midnapore, Hooghly and Howrah, but that the prospects of the early rice and the *bhados* crops generally were favourable. There is at present no reason to apprehend scarcity on account of deficient rainfall or disease among cattle. A certain amount of sporadic cattle disease is reported from some districts, but there is no indication that cattle-disease is more than usually prevalent."

## RE EXCAVATION OF KHALS

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether, having regard to the importance of re-excavating the *khals*, which have dried up, in the Lower Provinces, both for the purposes of sanitation and irrigation, something ought not to be done in this direction without delay, and the initiative taken by the Government in the matter, having in view specially the manifest blessing the Eden Canal has proved to those parts, through which it runs?

The Hon'ble MR. BUCKLEY replied —

"It is a fact that certain khals in Lower Bengal have silted up from natural causes, but often where this has occurred others have opened out to take their places, and it is doubtful whether a system for a general clearance of old channels would give any beneficial result.

"Special cases have been dealt with from time to time, as their urgency has been brought to notice, such as the Buxi-Gaighatta and Protapkally khals, while the numerous channels which drain the areas of country protected by flood embankments in the Midnapore and Hooghly districts are periodically cleared.

"At this time of year the silt clearance of khals is not easily possible, but consideration will be given to any particular cases which may be brought forward.

"Schemes directed to sanitary improvements come within the provisions of the Bengal Sanitary Drainage Act, 1895, under section 3 of which the initiative must be taken by the District Board."

## APPLICATION OF PUBLIC WORKS CESS TO OPENING AND MAINTENANCE OF ROADS.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether, having regard to the fact that the revenue, derived from the Road Cess, being wholly insufficient to meet the purpose for which the cess is levied, a portion of the income, obtained from

the Public Works Cess, ought not to be diverted towards the opening and maintenance of roads in these Provinces, as complaints in regard to roads in the interior are general?

The Hon'ble Mr. RISLEY replied —

“ Out of the estimated proceeds of the Public Works Cess during the current year, a sum of Rs 10,86,000 has already been allotted for the construction and maintenance of roads ”

### POLLUTION OF THE RIVER HOOGHLY

The Hon'ble Mr. RISLEY said — “ With Your Honour's permission I will take this opportunity of replying to certain questions previously asked in the years 1895, 1896 and 1897, on the subject of the alleged pollution of the Hooghly by effluxions from the mills and factories situated on the banks of the river —

Reports by the Sanitary Commissioner and Deputy Sanitary Commissioner on the alleged pollution of the Hooghly and of the Bally Khal by the effluent of certain mills are now being printed, and will be laid on the table. The Sanitary Commissioner is of opinion, after personal investigation, that no unwholesome waste from the Titagarh Jute Mill now passes into the Hooghly. In the case of the Bally Khal, the Deputy Sanitary Commissioner shows that the water, both above and below the paper mill, is impure and unfit for drinking purposes by reason of the presence of organic matter the bulk of which comes from the drains and latrines of the Bally and Uttarpara Municipalities. A small part only consists of mill refuse, and this is of vegetable origin and is comparatively harmless.”

### AMENDMENT OF THE CALCUTTA PORT ACT, 1890

The Hon'ble Mr. RISLEY presented the Report of the Select Committee on the Bill to amend the Calcutta Port Act, 1890, and moved that the Report be taken into consideration. He said —

“ As originally drafted, the Bill has been received with general approval by all the authorities consulted and no suggestions for its further amendment have been made. A slight change in its form has been introduced by the Select Committee which is explained in the report. They say —

‘ One of the objects which it was intended to secure was an extension of the period of the Port Commissioners' liability for goods committed to their charge from two to three clear working days. We are advised that the Bill as drawn will not meet this object, and we have accordingly added a section specifically amending section 113 of the Act by substituting ‘ three ’ for ‘ two ’ ”

“ It was the intention of the Port Commissioners in 1894 to grant this concession, and in practice they have been, I understand, giving that number of free days, that is to say, they have been giving a third day in addition to the two days allowed by the Act. It was ascertained that, under the law as it stands, they have no legal power to do this, and that when they did so, they could not assume the liability which it is essential they should have, and therefore the additional day which they gave would be of no use to the parties to whom they gave it. In its present form the Bill will effect all the objects which the Port Commissioners and the mercantile community desire it should effect, and I submit that it may now be passed by the Council.”

The Motion was put and agreed to.

The Hon'ble Mr. RISLEY also moved that the Bill, as amended by the Select Committee, be passed.

The Motion was put and agreed to.

**BENGAL GENERAL CLAUSES BILL.**

The Hon'ble SIR CHARLES PAUL moved that the Bill for further shortening the language used in Bengal Acts, and for other purposes, be referred to a Select Committee consisting of the Hon'ble Nawab Bahadur Syud Ameer Hossein, the Hon'ble Mr. Bolton, the Hon'ble Babu Saligram Singh and the Mover

. The Motion was put and agreed to.

The Council adjourned *sine die*.

The Report on the Government Cinchona Plantation and Factory in Bengal for the year 1897-98

Read also—

The Report for 1896-97 and the Resolution of Government recorded thereon

UNLIKE the two previous years, there was nothing abnormal in the climatic conditions of the year under review, and though the rainfall was slightly below the average, it was well distributed throughout the rainy season. The number of trees up-rooted at the plantation for their bark was 245,109 against 1,064,200 in the previous year, while 40,207 young trees of the quinine-producing kinds were planted out. The result of the year's operations was that the total number of living cinchona plants at the Government plantations (excluding the nursery stock, which amounted to 212,787) at the close of the year was 2,478,449

2 The crop of the year amounted to 318,715 lbs. of dry bark, of which 212,175 lbs. were obtained from the trees up-rooted in the Government plantations in Sikkim, and 106,540 lbs. from the trees in the plantation at Nimbong purchased a few years ago. In addition to this quantity, 418,802 lbs. of bark were purchased from private plantations in Sikkim and Southern India. The quantity of bark made over to the cinchona factory for manufacture into quinine and febrifuge was 511,933 lbs.

3. The outturn of the factory was 10,149 lbs. of sulphate of quinine and 4,075 lbs. of cinchona febrifuge against 10,673 and 3,452 lbs. respectively in 1896-97. The following statement compares the issues of the year with those of the preceding year.—

Owing probably to the prevalence of scarcity the demand from Bengal for sulphate of quinine to be sold at post offices decreased by 1,100 lbs, but on the other hand the Superintendent of the Aligarh Jail was supplied with 800 lbs for the introduction of the system into the North-Western Provinces. The stock of sulphate of quinine in hand at the close of the year was less by 791 lbs than it was at the close of 1896-97, but the Superintendent recognises the advisability of having always in stock, at the commencement of a year, a quantity equal to the year's probable consumption.

4. The following statement compares the receipts from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantation during the last two years —

5 The expenditure on the plantation amounted to Rs. 66,509 against Rs. 82,143 in the previous year, the decrease being chiefly in the salary and exchange compensation allowance of the Deputy Superintendent, owing to the retirement of Mr. Gammie, the late Deputy Superintendent, and under "Contingencies" due to the cessation of the transport of bark from Nimbong. Dr. Prain suggests that, in the event of similar savings again occurring, they might be devoted to making the present temporary bridge across the Kungjo stream on the road that connects the plantation and factory with the Tista Valley road into a permanent one. The amount spent on account of the factory rose from Rs 79,867 to Rs. 89,278. This sum includes the price paid for the bark purchased from private plantations.

6. The cash receipts show a surplus over cash expenditure of Rs 21,010, but owing to the fall in the price of bark there has been a large decrease in the value of the stock in hand, and Dr. Prain estimates the net profits at Rs 11,632 as against Rs. 9,767 last year. Under the circumstances this must be held to be very satisfactory.

7. Sir George King, Superintendent of Cinchona Cultivation, and Government Quinologist, who retired in February last, had with conspicuous success directed the preparation by Government of the medicinal products of cinchona from their very commencement, and his brilliant services have already been acknowledged in a separate Resolution. The Government also lost during the year the services of Mr. J. A. Gammie, Deputy Superintendent, who had been associated with cinchona cultivation since its commencement. The Lieutenant-Governor now desires to thank Surgeon-Major Prain, who has succeeded Sir George King, for his efficient management and for the interesting report submitted by him.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

The Reports for the two previous years and the orders of Government recorded thereon

SIR JOHN LAMBERT, K.C.I.E., held the office of Commissioner of Police from the beginning of the year until his retirement on the 26th May, when he was succeeded by Mr. James, who was in charge up to the end of the year. The report was due to Government on the 1st May, but was not received until the 30th July. The increase of work thrown on the Commissioner of Police in connection with the plague, and the necessity of preparing the statements in the new forms prescribed in Home Department Resolution No. <sup>5Police</sup> 591-34, dated 25th September 1896, retarded the completion of the report, but do not fully account for the very great delay in its submission. It should certainly have reached the Government earlier, and the Lieutenant-Governor trusts that similar delay will not recur in the future.

2 The following table shows the total number of cognizable and non-cognizable offences reported in the town and suburbs of Calcutta during each of the last five years.—

1	2	3	4	5	6
	1893	1894	1895	1896	1897
Town	36,552	41,512	45,291	51,855	50,867
Suburbs	11,242	13,014	13,569	15,064	13,576
Total	47,794	54,526	58,860	66,919	64,443

The total in the past year was greater than in any preceding year, except 1896, which was an abnormal year owing to high prices throughout Bengal.

The table below contrasts the crime of the past three years, showing separately cognizable and non-cognizable crime, and offences under the Indian Penal Code and under the municipal and other laws:—

1	2	3	4
	1895	1896	1897
Cognizable { Penal Code ...	6,886	8,116	7,619
{ Miscellaneous ...	24,392	26,714	27,332
Non-cognizable { Penal Code ..	6,760	6,608	6,359
{ Miscellaneous ...	20,892	25,481	29,340
Total	58,860	66,919	64,443

It will be observed that, as compared with the figures for 1896, offences under the Indian Penal Code decreased by 853 in the past year, and offences against the municipal and other laws, which are, with few exceptions, of a petty character, by 1,623. The Police, however, displayed greater activity in prosecuting for breaches of these laws, the number of miscellaneous cognizable offences reported showing an increase.

3. The following statement shows separately the number of cognizable and non-cognizable cases during the last two years, and their results, and also the division of work between the Courts of the Presidency and Suburban Magistrates during the past year —

The total number of cases tried in the town and suburbs during the year was 43,044, of which 38,861 or 90.30 per cent ended in convictions. The police sent up 34,053 cognizable cases and obtained convictions in 29,518 or 86.68 per cent. The percentage of conviction was higher than in the preceding year in the total number of cases tried, but lower in the police cases. Of 1,882 cognizable cases taken up by the Magistrates direct, 697 or 37.03 per cent resulted in conviction. This low percentage, though an improvement over the figure for the previous year, indicates a strong necessity for fuller examination of the complainants before ordering the issue of process. It is observed that of the 24,013 non-cognizable cases instituted in the town only 7,391, or 31 per cent., are shown as having been tried, while in the previous year 14,032 out of 24,474, or 57 per cent., were tried. The very small percentage of cases actually heard in the past year should be explained, and the Lieutenant-Governor desires that an explanation may be submitted.

The total number of persons arrested in the town and suburbs on cognizable charges fell from 41,234 to 40,498. Of these, 37,507 or 92.6 per cent. were convicted.

4. *False cases* — The number of false cases in the town and suburbs was 70 and 42 respectively, as compared with 61 and 40 in the previous year. The complainants were prosecuted in 20 of the cases in the town, and fined in 17; one case was struck off in default of appearance, in one case the accused was discharged by the Magistrate and one case was compromised. In the suburbs 17 prosecutions were instituted. In 2 cases the accused were discharged by the Magistrate, 1 case was struck off in default of appearance and 5 cases were compromised. In 7 cases fines were inflicted amounting in the aggregate to Rs. 170, which sum was awarded as compensation to the aggrieved parties. In 2 cases the accused were sentenced to terms of imprisonment. These figures do not appear to the Lieutenant Governor satisfactory. The offence of

bringing false criminal charges is a serious one, involving much harassment to innocent persons, but the number of prosecutions last year was small and then results were not such as to produce much deterrent effect

5 *Property stolen and recovered.*—The total value of property stolen was Rs 1,69,608 against Rs 2,97,675 in the previous year. Property to the value of Rs 91,109, or 53.71 per cent, was recovered against Rs 1,92,398, or 64.63 per cent, in the previous year. A reduction in the percentage of recovery does not necessarily indicate inferior work on the part of the Police, the degree of success being largely dependent on the circumstances of the cases.

6 *Cognizable offences in the Town.*—The number of cognizable cases in the town was 26,592 against 27,363 in 1896. There was a decrease under all heads of crime under the Penal Code, while an increase occurred in offences against other laws. Of the serious offences under the Code the following may be noticed. There were 7 cases relating to coins against 11 in 1896. The number of murders was 9, against 2 in the previous year and 9 in 1895. In 3 of these cases the accused were convicted and sentenced to death, in 3 others they were found insane, and in the remaining cases they were acquitted. Of culpable homicide there were 5 cases as compared with 3 in the previous year. Forty-seven cases of grievous hurt were reported against 40 in the previous year, and 6 cases of kidnapping against 38. The number of robberies was 3, the same as in the previous year. One hundred and fifty-two cases of burglary were reported true. The cases show a decrease of 33 as compared with the number in 1896, seventy-three were detected and 84 persons were convicted, results on the whole creditable to the police. The value of the property stolen was Rs 50,332 and of that recovered Rs 35,416. There were 1,700 cases of theft reported true, this being 27 less than the number in 1896, in 1,188 investigation was successful, and 1,320 persons were convicted; results again creditable. Property was stolen to the value of Rs. 1,50,605 and recovered to the value of Rs 85,005. Cases of criminal breach of trust were 187 in number against 476 in 1896, including 28 cases against cart-drivers and 5 against boatmen, who committed the offence in respect of property entrusted to them as carriers. The decrease in complaints under this head is very marked. It was stated in the report for 1896 that these cases are generally settled out of Court, and evidently many of them have been disputes of a civil nature. If, as the figures for the past year would suggest, the people are refraining from bringing such disputes before the Criminal Courts, the change is satisfactory. Under the Gambling Act there were 132 cases against 149 in the preceding year. Offences under the Police Act, and municipal and other miscellaneous offences were 10,717 in number against 12,888 in the previous year. Under the Shipping Act there were 70 cases against 292 in 1896, and under the Port Act 798 cases against 1,041 in 1896. The great decrease under these heads should have been explained and the Lieutenant Governor would be glad to have that explanation now. Under the Cruelty to Animals Act there were 7,323 cases against 6,890 cases in 1896.

7 *Non-cognizable crime in the town.*—The total number of non-cognizable cases was 6,259 under the Penal Code and 23,240 under the municipal and other laws, against corresponding totals of 6,608 and 25,481 in 1896. The most important case was one of forgery of Government currency notes. Seven persons were convicted and sentenced each to terms aggregating ten years. The notes were forged in a village of the Nadia district, where the men had provided themselves with a printing press and other apparatus. Some of the gang were convicted in that district, and others were arrested while endeavouring to pass a large number of the forged notes in Calcutta, and were convicted by the High Court. The detection of the gang was an important success of the Police during the year. Under the Municipal law there were 17,617 cases during the year against 17,454 in 1896. The number of bogus firms carrying on fraudulent business by means of advertisements in the mufassal papers and circulars to residents in up-country stations, which was reported to be 120 in 1895 and 74 in 1896, has now fallen to 57. The Lieutenant-Governor trusts that the attention given to these firms will be continued and have the effect of further reducing their number.

8 *Cognizable offences in the suburbs.*—In the number of cognizable cases in the suburbs there was a slight decrease, from 7,449 in 1896 to 7,301 in the year under review. There were six cases relating to coin against 4 in 1896. 4

murders against one in 1896, and one case of culpable homicide against 3 in 1896. Thirty-four cases of grievous hurt, being 16 more than in the previous year, and 38 cases of hurt by a dangerous weapon against 23 in the previous year, were reported. Burglaries and thefts also slightly increased.

9. *Non-cognizable crime*.—The total number of non-cognizable cases was 6,777 against 7,615 in the previous year. Cases under Municipal law increased by 1,084, the total for the year being 5,270.

10. *Suicides and accidental deaths*.—Suicides show an increase, numbering 101 against 73 in the previous year. The number of accidental deaths also rose considerably, from 186 in 1896 to 331 in the year under review. Ten persons lost their lives through a lamentable accident due to the fall of a portico under construction at the Martinière College. Twenty-two persons were killed by being run over. One hundred prosecutions for rash and furious driving were instituted and resulted in 91 convictions. In the Port of Calcutta 92 persons were accidentally killed. Of these, 63 were drowned.

11. *Working of the Arms Act*.—At the beginning of the year 3,008 fire-arms were held in stock by dealers. The number imported during the year was 3,959, and the number bought in India 1,850. Of these, 5,568 were sold. The closing balance showed 3,249 pieces in stock. Five prosecutions were instituted under the Arms Act and in four convictions were obtained.

12. *European Vagrancy Act*.—Ten European vagrants were in the work-house at the beginning of the year and 58 were received during the year—48 from Calcutta and 10 from the mufassal. Of these, 34 were discharged on obtaining work. Ten vagrants were also deported under agreements. The Alms House provided refuge for 24 seamen, for all of whom passages were arranged by the Superintendent.

13. *Fire-Brigade Act*.—The Fire-Brigade gave assistance at 32 fires during the year—14 in the town and on the river, 11 in the suburbs and 7 in Howrah. At ten other large fires the manual engines kept at out-stations were employed. One hundred other fires were reported, in which the value of property destroyed was trifling, not averaging more than Rs. 5 in each case. The total value of property lost by fire was Rs. 2,43,760, being slightly in excess of the loss in the previous year.

14. The sanctioned strength of the Calcutta Police Force was 2,997 against 2,891 in the previous year. The increase is due to additional men being sanctioned for the Kidderpore Docks and to the inclusion within the Calcutta force of the Hooghly Bridge Police. The percentage of casualties from retirements, dismissals, desertions, resignations and deaths, was 8.17. The number of punishments, judicial and departmental, remained much the same as in previous years. A sum of Rs. 3,634-4 was disbursed in rewards against Rs. 5,922-6 in 1896.

15. *Old offenders and anthropometry*.—The police kept surveillance over 714 released offenders during the year. Of these, 359 were Bengalis and 355 up-country men. Out of 961 accused whose antecedents were at first unknown 97 were eventually found, by means of anthropometry, to have been previously convicted.

16. The most important occurrence of the year in connection with the police administration of Calcutta was the rioting which took place at Tallah and the northern parts of the town on the 30th June and 1st July. A report was submitted to the Government of India in this Government letter No. 4113J, dated 28th July 1897, and it is unnecessary to enter into details here. Out of 87 persons sent up for trial in connection with these riots, convictions were obtained against 81. This result was satisfactory. The Government of India expressed their agreement with the opinion of Mr. Stevens, the Officiating Lieutenant-Governor, that the conduct of the Police throughout the riots was deserving of all praise. The necessity which arose, however, of summoning the military to the aid of the civil power drew attention to the fact that the strength and equipment of the Calcutta Police were defective, and recent events in connection with the out-break of plague in the city have confirmed the conclusion that the force should be strengthened and improved. Proposals have accordingly been submitted to the Government of India, and in the meantime the recruitment of additional men has been proceeding. Subject to the final approval of the Secretary of State, the Government of India have already sanctioned the creation of a company of Military Police for employment in the

vicinity of Calcutta This force will be located near Barrackpore, on the opposite side of the river, and will serve to keep in check or suppress any riotous out-breaks among the mill-hands In view of last year's riots it was also thought advisable to pass an Act extending to Calcutta the provisions of the Police Act V of 1861 relating to the quartering of additional police in disturbed areas at the cost of the inhabitants and the levying of compensation for injury to person and property done in such areas in the course of disturbances

17 *Judicial work.*—Mr. Pearson held the office of Chief Presidency Magistrate from the beginning of the year, until the 29th September, when he went on leave, his place being filled by Mr. Bonnaud The Hon'ble Nawab Bahadur Syud Amcer Hossein, C. I. E., was Magistrate of the Northern Division during the year, except from the 17th June to 31st July, when Mr. Bonnaud acted for him while absent on leave.

18. *Court of the Chief Presidency Magistrate*—The total number of cases instituted during the year was 11,986 against 13,289 in the previous year Of 11,807 persons prosecuted, 10,633 were convicted, and 1,138 acquitted or discharged Appeals were preferred against the order of the Court in 22 cases, but the order was reversed in no case. Out of 15 motions to the High Court 3 were successful

19 *Northern Division Court*—The total number of cases instituted was 16,966 against 17,077 in the preceding year. Of 18,650 persons brought before the Court 17,687 were convicted, 36 committed to the Court of Sessions, and 871 acquitted or discharged. The number of appeals was 34, and all were rejected. In 8 out of 15 motions to the High Court, the original order was set aside

20 The following statement compares the number of persons against whom process issued in non-cognizable cases with the number actually appearing during the past two years —

NAME OF COURT	Number of persons against whom process issued		Number of persons actually appearing		Percentage of persons appearing to persons against whom process issued		REMARKS
	1896	1897	1896	1897	1896	1897	
1	2	3	4	5	6	7	8
Chief Presidency Magistrate	2,688	2,837	1,418	857	52.7	30.2	
Presidency Magistrate, Northern Division	4,865	4,904	1,707	1,351	35.2	27.5	
Honorary Presidency Magistrates	1,322	19,880	12,429	9,775*	64.3	49.1	
Total	26,865	27,621	15,554	11,983	57.9	43.4	*(Including three persons whose trial was pending at the beginning of the year)

The percentage for the past year for all the Courts was even lower than that of the previous year The Chief Presidency Magistrate observes that the number of persons who do not appear must always be large as long as the law allows cases to be withdrawn, abandoned or compounded. This does not, however, explain the great divergence in the percentages in the past two years. In the Court of the Chief Presidency Magistrate 547 cases were dismissed under section 203, Criminal Procedure Code, against 442 in 1896, and in the Northern Division Court 1,258 cases against 979 It appears that out of 372 persons against whom process issued from the Chief Presidency Magistrate's Court on charges under sections 504, 506—510, Indian Penal Code (intimidation, insult and annoyance), only one person or 27 per cent was convicted. This presumably affords further evidence of the necessity for more fully examining the complainant before the issue of process.

21. *Work of Honorary Magistrates.*—The number of cases referred for trial to the Honorary Magistrates during the year was 5,299, and they also had on their files 17,484 municipal cases. Of the total of all classes of cases (22,783) it

appears from the statement in paragraph 3 above that only 9,728 were actually tried, the remainder having been struck off for non-appearance or compromised or withdrawn. Nine appeals were preferred against the orders of Honorary Magistrates. Of these, one was successful and another partially so. Motions were preferred in 6 cases, with the result that in one case the order was set aside, and in another the sentence was modified. In the municipal cases fines were inflicted to the amount of Rs. 23,280-14, out of which Rs. 17,625-4-3 were realised. The unrealised balance appears large. The Lieutenant-Governor again takes the opportunity of thanking the Honorary Presidency Magistrates for the large amount of work done by them during the year. He notices that the number of cases in which Honorary Magistrates failed to attend without giving notice was fewer than in the previous year. The thanks of Government are in particular due to those Magistrates whom Mr. Pearson mentions as having frequently attended when requested to do so at the shortest notice.

22. Under the new Code of Criminal Procedure the Lieutenant-Governor has declared the Honorary Presidency Magistrates to be subordinate to the Chief Presidency Magistrate to the same extent as the Magistrates in the interior are subordinate to the District Magistrates. This is an improvement in the law, which was needed. Under section 557 of the Code legal practitioners who appear in the Presidency Courts have been disqualified for appointment as Honorary Presidency Magistrates.

23. Sir John Lambert severed during the year his long connection with the Police of Calcutta. The Lieutenant-Governor in reviewing the last report recorded his appreciation of the value of his services. Mr. James had within a very short time of succeeding him to deal with much excitement in connection with the Tallah riots, and there has been a recurrence of excitement since. His tenure of office has so far been attended with much anxiety, and he has earned the thanks of the Government by the manner in which he has discharged his responsible duties. The favourable mention made of Mr. Paget, the Deputy Commissioner, and of the other officers mentioned in paragraph 38 of the report has been noted by Government.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and for communication to the Presidency Magistrates.

Ordered that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government, for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Chief Secretary to the Government of Bengal.*

# REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1898-99

No 639B, dated Calcutta, the 16th August 1898

From—E V LEVINGE, Esq, Offg Secretary to the Board of Revenue, L P,  
To—The Secretary to the Government of Bengal, Financial Department

I AM directed to submit the following report on the state of the  
SALT salt market for the first quarter of 1898-99,  
THE HON'BLE MR W H GRIMLEY comprising the months of April, May and June  
1898

2. The quantity of salt of every description cleared during the quarter under review amounted to 28,36,853 maunds, as compared with 26,59,942 maunds in the previous quarter, and 26,17,863 maunds in the corresponding quarter of the previous year, and the net amount of duty levied thereon was Rs 67,29,251, as against Rs. 62,57,638 in the previous quarter, and Rs. 61,10,816 in the corresponding quarter of the previous year.

3 The quantity of locally-made salt removed from the *Golas* in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I below —

The total fall of rain from 14th to 20th August 1898

The average fall of the corresponding period for 24 years, Surveyor-General's Office

The total fall from 1st January to 20th August 1898

The average fall of the corresponding period for 24 years, Surveyor-General's Office

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast, g, gloomy, d, drizzling rain, p, passing temporary showers; t, thunder.

## UNIVERSITY ENTRANCE EXAMINATION

## PRIVATE STUDENTS

1 *Private students* are those who do not appear from any school or who have been transferred from one school to another after the 31st August without the consent of the Inspector. The term 'private students' includes *school masters*.

2 Private students must appear at the test-examination of one of the following institutions —

Those from the	At the test-examination of	Date of test-examination
1	2	3
1 Howrah district ..	Howrah Municipal School ..	12th December 1898
2 Bankura „ ..	Bankura Zilla School ..	
3 Birbhum „ ..	Birbhum ditto ..	
4 Midnapore „ ..	Midnapore Collegiate School ..	
5 Hooghly „ ..	Uttarpara Government School ..	On the date fixed by the Principal of the Burdwan College
6 Burdwan „ ..	Burdwan Raj Collegiate School (with the Principal's permission)	

The examinations will begin as stated above, and each private student will pay a fee of Rs 2 to the head of the institution at which he appears for examination. The balance after payment of expenses (stationery, etc.) will go as remuneration to the examiners.

3 Applications for permission to appear must be sent so as to reach *this office* not later than the 1st December with the following information, etc. —

*From Private Candidates proper*

- The name of the school in which the candidate last studied.
- The transfer certificate (in original) granted to the candidate from the same, or
- In the case of a candidate who previously appeared at the Entrance examination, the Registrar's receipt (in original) for the fee paid.
- Age of the Candidate.

*From School-masters*

- A certificate from the Secretary or Proprietor of the school in which the candidate is serving to the effect that he has been a *bond fide* paid teacher of the school in which he teaches, and has been so ever since the 1st June 1898. In case of a school-master who has served in more than one school, he must produce certificates from the several schools in proof of his having been a *bond fide* paid teacher all along since the 1st June 1898.

Failing to produce the above certificate or certificates, a school-master will be subject to the rules applicable to *bond fide* private candidates, as given above.

4. If this office is satisfied that all is in order, the Inspector will countersign and return the application, and this then will be the candidate's passport for admission to the test-examination.

5. The Head Master of an institution (one of those named above) should direct private students to appear before him not later than the 2nd January with their applications for admission to the Entrance Examination, and in the case of those candidates who have satisfied the test, he will cause them to sign their application forms in his presence, and will grant the necessary certificates, and then forward the applications to this office for countersignature, after which they will be sent by the Inspector direct to the candidates.

6. Expedition is necessary in carrying out all these instructions, and candidates should be most careful to give their names and addresses written legibly and distinctly, so that no mistake may be likely to occur.

7. Under no circumstances should the entrance fee be sent to this office.

8. Private students will understand that the test-examination of any schools other than those named above will not be accepted by this office.

9. Addresses of private students should be supplied to this office.

ABINASH CHANDRA CHATTERJEE,

*Inspector of Schools, Burdwan Circle.*

## OFFICE MEMO.

**RULES FOR APPEARING AT THE F A AND B A EXAMINATIONS FOR  
CANDIDATES FROM THE BURDWAN CIRCLE, WHO ARE NOT  
STUDENTS OF ANY AFFILIATED INSTITUTION**

DEPUTY INSPECTORS of Schools, Sub-Inspectors of Schools, and *bonâ fide* masters of English schools, who have served as such for the full period of two academical years, or of six months after the examination of the same class last held by the University in the case of those only who were admitted to a former examination of that class, will be admitted to the abovementioned examinations. The applications of school-masters should be accompanied by a certificate of length of service from the Secretaries or Managers of the schools in which they are employed, and should reach this office not later than the 7th January 1899. The application of a school-master for permission to appear at the F A or B A. examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed. The application should be forwarded to this office for countersignature, together with the Registrar's certificate to prove, if this be the case, that the candidate has appeared at the examination in a previous year, and the certificate in proof of his having passed the Entrance or F. A. examination as the case may be, and it will be sent back to him (the candidate) who will have to send it, together with the examination fee, to the Registrar of the University *direct*. School-masters are not required to pay any fee for getting their application for permission to appear at either of the abovementioned examinations countersigned by this office.

2 Candidates should read carefully the form of the certificate which this office is required to sign, and should be careful to supply all information and documents required, including the Registrar's receipt in the case of those school-masters who have been admitted to a former examination of the same class, without which the Inspector must decline to sign the certificate.

3 By *bonu file* masters of schools are to be understood masters who hold regularly paid appointments in English schools, teaching at least the M E. course.

ABINASH CHANDRA CHATTERJEE,

HOOGHLY,  
The 2nd August 1898.

NOTES.

1. This form is intended for use in the case of payments on account for works in progress or supplies in course of delivery, but this form, printed on yellow paper, must invariably be used for the final payments in such cases

2 Payments made by cheque or to recognized firms or institutions need not be attested

3 When the payee signs in the vernacular, the amount acknowledged should also be noted in the vernacular, as well as in English.

4 A special form, printed on yellow paper with the words "as a final payment in settlement of all demands" printed in, is to be used when the Contractor is finally paid up for the value of work, for which one or more payments on account have already been made. These special forms should be printed in English and in the vernacular of the district, and where the Contractor can write, he should be required to add in his own handwriting words to the effect that the payment is in full settlement of all demands.

5 In the case of payees who can neither read nor write, the payee shall make his mark or impress his seal, the fact of the payment shall be certified to by the officer who pays and by a witness of respectability

6 The Subdivisional Officer should be careful to note in the column of "Remarks" in the body of the bill the quantity of materials issued to Contractor, the value of which is to be deducted at time of payment

7 This certificate will contain one man's account only, full details of quantities of the different classes of work or supplies must be always set forth

§ The account for which the materials are purchased, whether for stock or for a work, must always be stated, and the name of the officer who took over the materials be entered, unless he is the officer who signs the certificate.

9 If the officer who prepares the bill has authority to make payment, only one signature at the foot of the bill is necessary.

[illegible]

## Notes.

## District Engineer's Form No.

1 Works should be promptly measured up and paid for, running accounts being avoided as much as possible

2 When the payee signs in the vernacular, the amount acknowledged should also be noted in vernacular as well as in English.

3 In the case of payees, who can neither read nor write, the payee shall make his mark or impress his seal, the fact of the payment shall be certified to by the officer who pays, and by a witness of respectability

4 A number of supplier's own bills or requisition forms may be summarised on this form, and paid in one sum, it would not in such a case be necessary to repeat the details in this form, as the original bills would be attached to it

5 If the bill is prepared by the officer authorised to make or order payment, a single signature will suffice

6 A receipt stamp is required for every payment exceeding Rs 20

7 The amount acknowledged as received by the contractor must be entered in words and figures

8 This form will not be used for payments on account or for settlement of necessary accounts Form 8 is suitable for these purposes.
